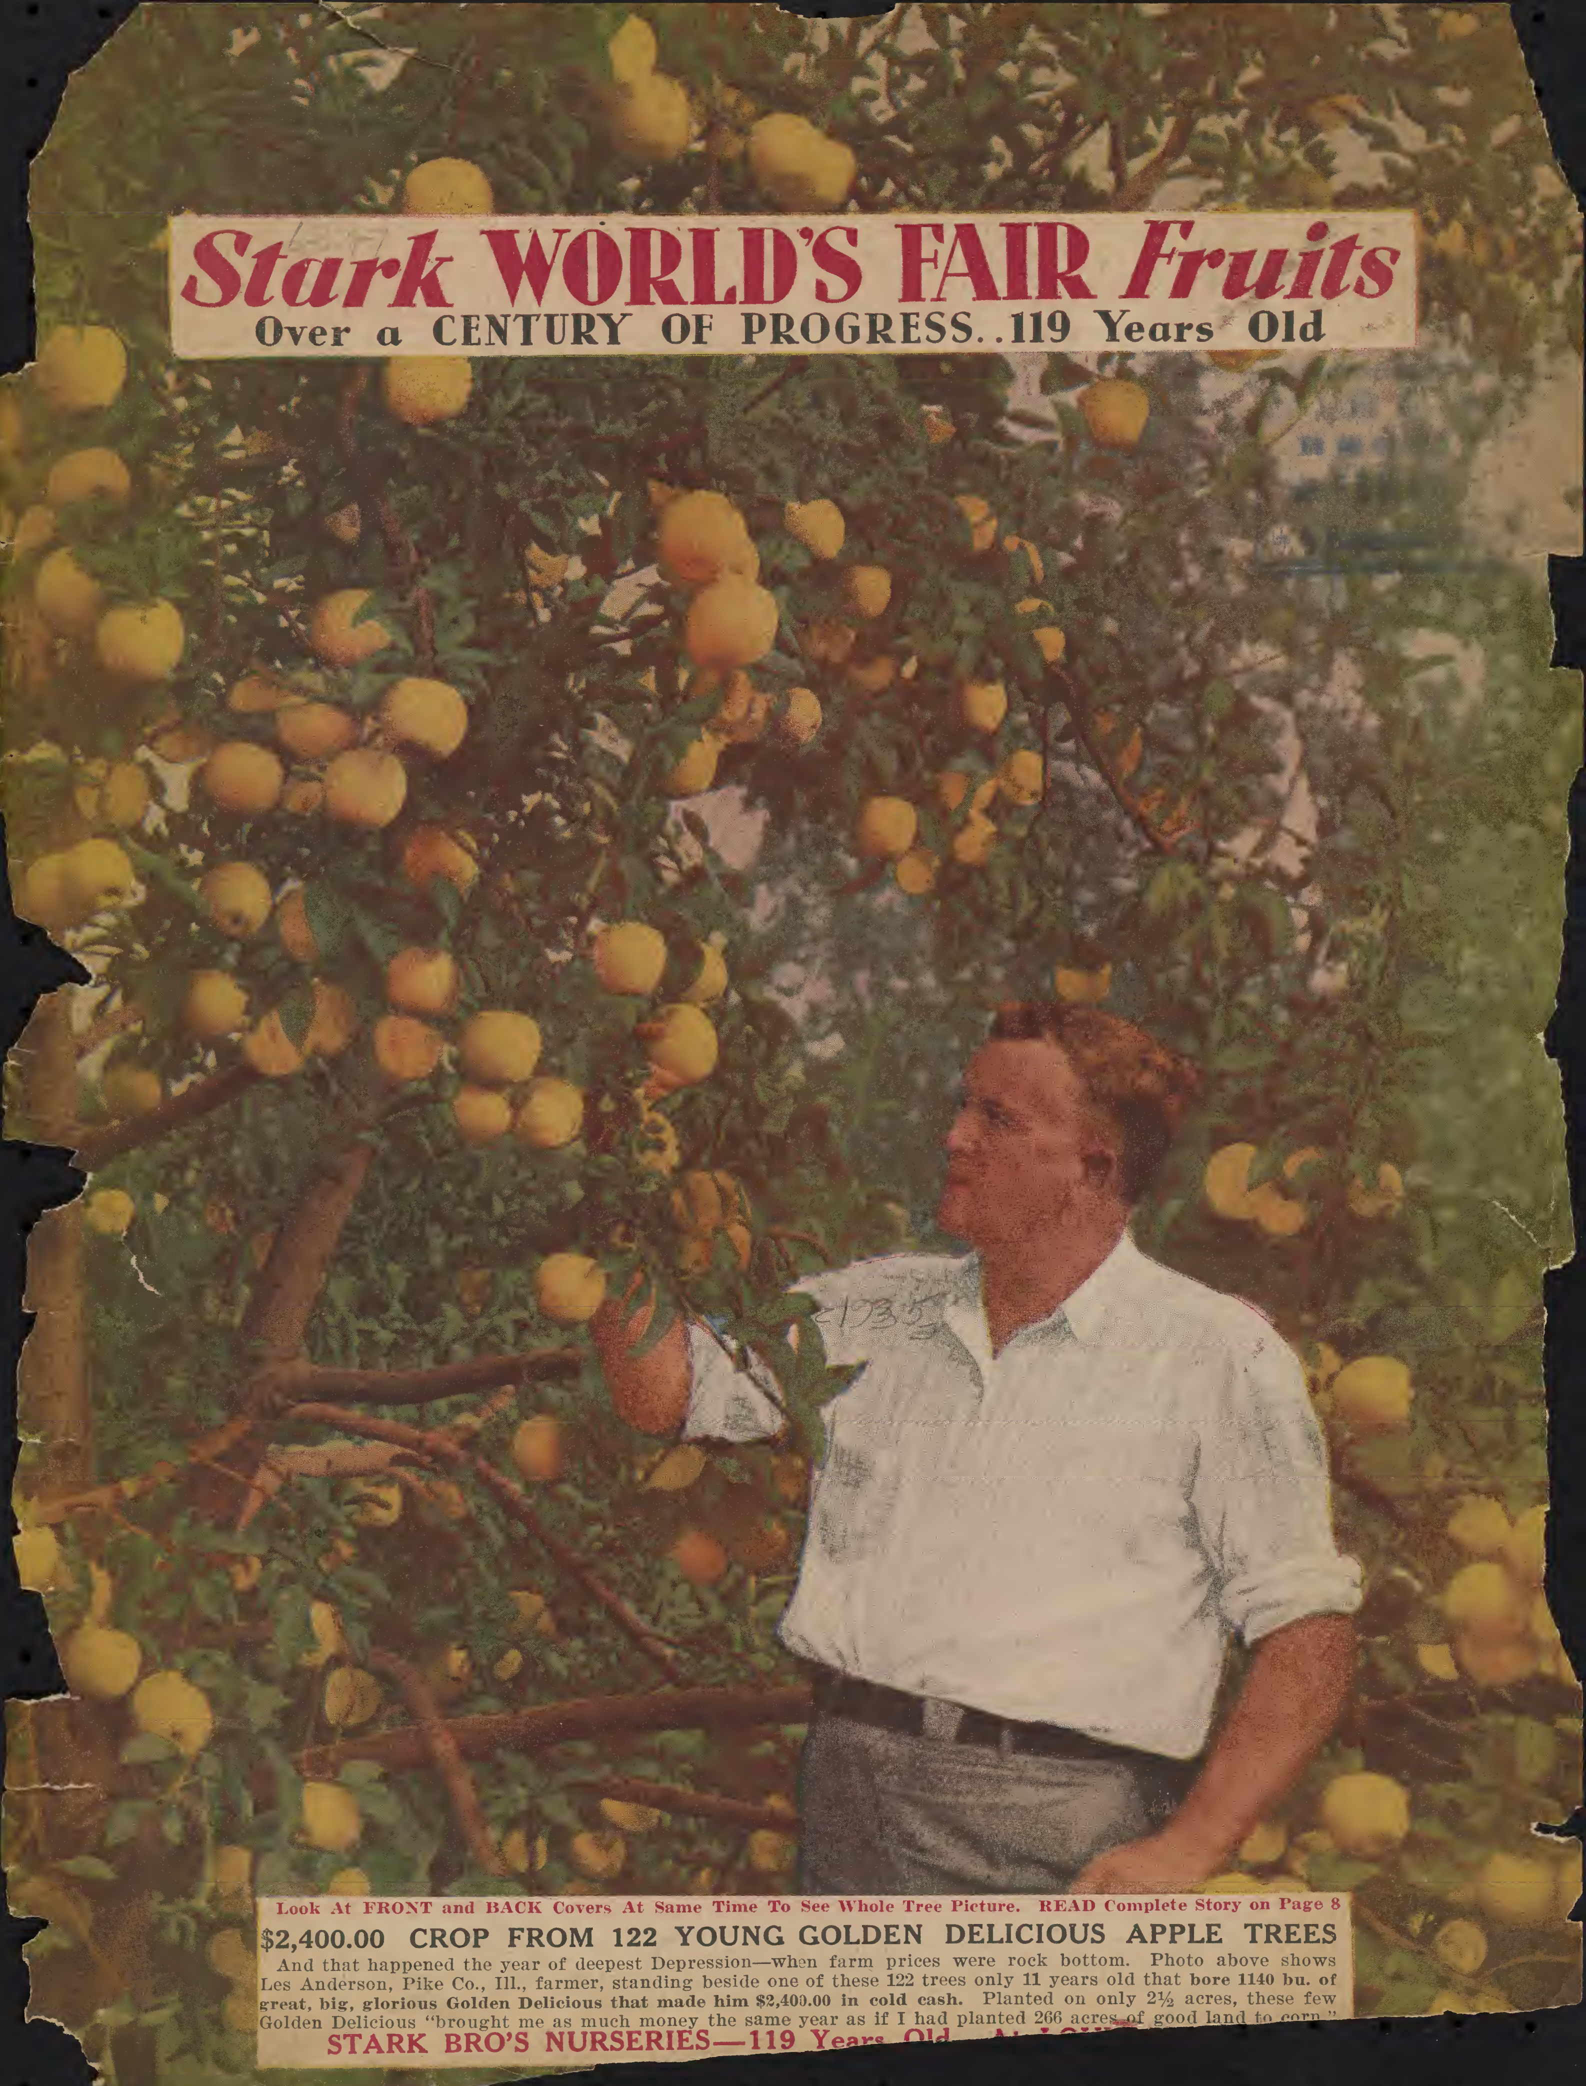
Stark WORLD'S FAIR *Fruits*

Over a CENTURY OF PROGRESS..119 Years Old



c1935

Look At FRONT and BACK Covers At Same Time To See Whole Tree Picture. READ Complete Story on Page 8

$2,400.00 CROP FROM 122 YOUNG GOLDEN DELICIOUS APPLE TREES

And that happened the year of deepest Depression—when farm prices were rock bottom. Photo above shows Les Anderson, Pike Co., Ill., farmer, standing beside one of these 122 trees only 11 years old that **bore 1140 bu. of great, big, glorious Golden Delicious that made him $2,400.00 in cold cash.** Planted on only 2½ acres, these few Golden Delicious "brought me as much money the same year as if I had planted 266 acres of good land to corn."

STARK BRO'S NURSERIES—119 Years Old

Sold ONLY by Stark Bro's Nurseries

STARKING—Double Red Delicious

TRADE MARK REGISTERED

$6,000.00 Glorified Red Delicious

"**THE Most Delicious Red Apple In ALL The World!**" declared Luther Burbank when we first discovered the ORIGINAL Starking tree years ago.

One limb of this Stark Delicious tree bore apples that turned a brilliant, deep-red ALL OVER (even to the calyx end) weeks before the regular Delicious—when the Delicious were green or only slightly striped. **WE PAID $6,000.00 FOR THIS MYSTERY TREE—JUST TO EXCLUSIVELY CONTROL PROPAGATION FROM THIS LIMB.**

We then gave this new apple the name **STARKING**—which name we registered as a TRADE MARK—and fully **Protected Our Exclusive Rights.**

STARKING is an extra large **LATE WINTER** crisp keeping apple, marked with the five knobs characteristic of **Genuine** Stark Delicious. Its beautiful waxen, vivid **RED** skin covers tender, juice-laden crisp flesh, blessed with a delightfully tangful flavor and an aroma like that of rare old wine.

One of America's greatest fruit connoisseurs has enthusiastically declared: "**Starking apples possess the Champagne of ALL Apple Flavors!** No other red apple rivals its super-rich quality!"

Moreover, Starking apples **retain** their crisp, enticing flavor even after long storage. Because they **COLOR ALL OVER** weeks before Delicious, the Starking crop **can be picked when still hard ripe and yet RED ALL OVER—before the Delicious Apples are half red.** The Starking will, therefore, keep **PERFECTLY** in ordinary storage until late Spring—retaining all its firmness, crispness and incomparable flavor and quality **and DOESN'T GET MEALY!**

That Never-to-be-Forgotten Flavor

The superlative Starking apple simply cannot be compared with any other red winter apple. Its crisp flesh is overflowing with an exquisite, aromatic flavor—and a rich, refreshing juiciness not found in any other red apple.

Starking apples at picking time are **much firmer-fleshed apples and even better flavored than Delicious.** I have 200 Starking trees now 5 years old. **They bore their first crop at 3 years** and are younger bearers than Delicious.—Edward E. Heid, Jefferson Co., Indiana.

All my customers say that **Starking—is the best red apple they ever tasted** and the most beautiful they ever saw. I get 25 per cent more money for them than for any other apple. My Starking trees bore 3 years younger than old Delicious.—A. Svonavec, Summit Co., Ohio.

The Starking apple has a **juicier, finer flavor than the old Delicious.** My 150 Starking trees began to bear 2 years younger than Delicious trees. I have no trouble in getting **much higher prices for my Starking apples** than for old Delicious—because of the far better color.—Mrs. Dora Lee Smith, Putnam Co., Tennessee.

I get 50 per cent higher prices for my Starking apples than for Delicious **because all my customers think the FLAVOR and COLOR of the Starking is SIMPLY WONDERFUL.**—Philip Weisbrod, Kossuth Co., Iowa.

Keep Crisp, Juicy Until Late Spring

Because it **COLORS ALL OVER** weeks earlier than old Delicious, the Starking is picked when still HARD-RIPE, though already a Solid Crimson Red. Tests by apple authorities **PROVED** that Starkings after **ONE YEAR AND 3 MONTHS STORAGE** were still perfect, firm, juicy—with no scald or decay—NOT THE LEAST MEALY.

Prof. T. J. Talbert, Mo. State Horticulturist, after sampling Starking apples that had been in storage from October one year to December the next year (15 months) stated: "These have held up remarkably well. **Show no signs of scald or decay,** have retained their fine deep red color and are good to eat. **Still very firm and juicy.** High quality and good shipping and keeping ability."

This extra red color of Starking assures fruit growers **Earlier Picking, Firmer Fruit for Long Storage Keeping** and **Better Quality During A Longer** Storage Season.—Prof. Gourley, Chief Ohio Hort. Dept.

The increased color of the Starking makes it possible to pick the fruit earlier and **make the apples keep longer.** This is of great value to commercial orchardists.—Prof. Potter, New Hampshire State Horticulturist.

The keeping quality of Starking apples is **ASTONISHING. I have held them up to June the next year after picking and THEY WERE STILL FIRM, CRISP** and **JUICY.**—P. Weisbrod, Kossuth Co., Iowa.

Extra Large Size—Most Perfect Shape

The uniform, perfectly shaped LARGE SIZE of Starking apples surprises all who plant this Improved Double-Red Delicious strain. It is astonishing what a large percentage of crop packs out extra fancy apples, of largest size and Perfect Shape!

Starking, side by side ordinary Delicious, show tremendous contrast in color. Starking is beautiful deep red, when Delicious are still green. **Our Starking apples grew to 48 to bushel size** (apples over 12½ inches in circumference). Brought exceptionally high prices. **Our Starking Trees planted late in Spring 2 years ago bore apples this year.**—American Fruit Growers, Inc., World's Largest Orchard Co., with Headquarters, in Pittsburgh, Pa.

People in this vicinity were startled at the **SIZE** and **QUALITY** of my Starking and Golden Delicious apples. They didn't know that apples like these could be grown in Kentucky.—Jos. Waggener, Webster Co., Ky.

I gathered 100 bushels extra fine Starkings, **even though the drouth was the worst in history.** All my customers wondered how the Starking apples grew so **BIG** and had such **WONDERFUL COLOR.** Sold for much higher prices than Delicious.—Chas. W. Hamilton, Taylor Co., Iowa.

I would rather plant Starking than any other red apple because **Starking apples are larger, finer-flavored, higher colored fruit.** My Starkings bore 2 years younger than Old Delicious. My Starking apples bring much higher prices on the market.—Harry Roberts, Madison Co., Tenn.

The Leader of ALL Stark World's Fair Red Apples

"I WON a fine **CASH AWARD** for my Starking apples **EXHIBITED AT THE WORLD'S FAIR IN CHICAGO** last year. My Starking trees bore years younger than Delicious—and **DESPITE THE WORST DROUTH IN A CENTURY,** I harvested 260 bushels of splendid size, Solid Red Apples from my 108 young Starking trees this year. I also picked 2500 bushels of Golden Delicious apples this year from trees bought from your nurseries! They are selling fast at good prices!" —reports that good Illinois Orchardist, W. J. Anson of Bureau County.

My 3 yr. old STARKING Trees

"EVERY one of my 3-yr.-old Starking trees bore this year!" says Jos. A. Richartz, Yakima Co. "Here is a photo of one of these amazing young trees. **They averaged TWO AND ONE-HALF BUSHELS per tree.** Two of these trees bore 4 bushels each.

"All the apples were very large—most of them running 64, 72 and 80 to the bushel. EVERY apple had **100 per cent solid RED color**—even those on ends of limbs that bent to ground and were entirely covered by undergrowth.

Buyers Demand High Color Apples

The Big Apple Buyers either won't buy partly colored apples at all—or will pay only low prices for them. The apple buying public **DEMANDS** Brilliantly Colored apples, like the ALL-OVER-RED Starking or the glowing-yellow Golden Delicious. Fine color brings fine market prices. Here is proof:

The 100 per cent Bright-Red Color of my Starking apples makes them sell on sight. I have no trouble in getting **50 per cent more for Starking** than for old Delicious.—W. L. Rosin, Erie Co., Ohio.

I sold **ALL** my Starking apples for $2.50 per bushel this past fall.—R. W. King, Wake Co., North Carolina.

All my Starking apples sell quickly for **$1.00 more per bushel than Delicious.** This is due to the better color and finer flavor.—Mrs. E. L. Bower, Richardson Co., Nebr.

I gathered 400 bushels from my 300 young Starking trees this year—and had no trouble in selling them for **33⅓ per cent higher prices than the Delicious.** These Starking trees began bearing when 4 years old. The high color of the Starking apple attracts attention on the markets and they sell at high prices when the lack of color on old Delicious compels one to sell old Delicious at lower prices.—F. L. Andrews, Spokane Co., Wash.

My Starkings always sell for $1.50 more per bushel than I can get for old Delicious.—C. Golden, Hot Spring Co., Ark.

Sells for $3.50 Bushel

Years ago, Prof. W. S. Brown, Oregon State Horticulturist, announced: "STARKING IS A WINNER!" That was after he had traveled 3,000 miles to inspect the Original Starking Tree.

Today, Starking has proved to be a Big Profit Winner for fruit growers in every section. From TENNESSEE, R. L. WALLACE, Harriman County Orchardist, reports:

> "My 400 Starking and Golden Delicious trees bought from your nurseries **bear every year** and are very thrifty growers. The young Starking trees each bore from 5 to 7 bushels of beautiful, all-over crimson red apples last year. **I easily sold them for $3.50 a bushel!** They always bring the top prices on **EVERY** market!"

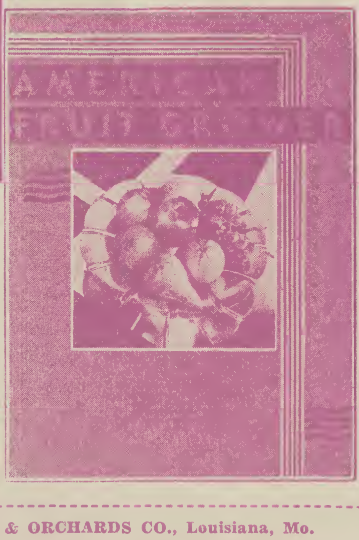
World's Highest Award

The American Pomological Society is the highest authority on apple value in all the Western Hemisphere. The Committee on Awards of this Society, headed by Prof. C. P. Close, U. S. Government Pomologist, unanimously voted to confer the HIGHEST HONOR OF THE HORTICULTURAL WORLD—THE FAMOUS WILDER MEDAL—ON THE STARKING APPLE! In recommending this award, Prof. Close said:—

> "The particular VALUE of Starking is in the **early red color** which makes it possible to pick and place the fruit in storage when it is 'hard ripe.' This will not only lengthen its commercial life—but, THE STARKING APPLE WILL NOT GET MEALY."

We Urge You to Subscribe to *The Best* FRUIT MAGAZINE *in America*

Only $1.00 *for* 3 Years



WHAT READERS SAY

I like the Fruit Grower very much and, at the price, you are making us a present of the magazine.—L. J. Wright, Collinsville, Conn.

How you can send out so excellent and useful a magazine at that price, I cannot understand. —M. T. Cleland, Pewee Valley, Ky.

This magazine fills a place that is not supplied by any other that I take.—A. W. Benson, Maitland, Fla.

Scarce an issue but contains some item easily worth a year's subscription.—J. B. Simon, Davenport, Iowa

We urge you to subscribe to it because, in our judgment, it is a magazine to which every fruit grower should subscribe.

It is the last word in practical, constructive fruit growing and you cannot afford to be without it.

Obey that impulse! The coupon is for your convenience—send it to

STARK BRO'S NURSERIES & ORCHARDS CO., Louisiana, Mo.

Subscription rates: Three years, $1.00; one year, $0.50

Stark Only Sells "Record-Bearing" Strain Trees

Trade-Mark

We Spent $50,000 To ASSURE You Extra Value

Now, after years of investigation and **at the expense of more than $50,000.00,** we have changed **ALL** our varieties to "Record-Bearing" Strains. ALL Stark Trees are propagated from the best known Record-Bearing Parent Tree of each variety—or from trees scientifically proved to have superior bud variations and bud sport characteristics—with the ability to transmit to their offspring superior higher color and earlier color, uniformity of shape and type, greater crops, larger fruit.

Leading horticulturists and most successful orchardists, **in planting their own orchards,** prefer to plant Stark Trees that they **KNOW** have been propagated from Parent Trees of **KNOWN** Bearing Records. For instance, Prof. Green, for years Chief State Horticulturist of Ohio Experiment Station, stated:

"If I were planting an orchard myself, I would prefer that the nursery stock I used would be propagated from trees of known records."

Prof A. D. Shamel, in charge of U. S. Govt. Fruit Improvement investigation, says **"Of Great Value To Fruit Industry!"**

This Absolutely Assures Greater Tree Value

It preserves Superior Colored Strains, like Starking, etc. It perpetuates Heavy Bearing Types, such as Golden Delicious. It keeps "drone" trees out of Stark Trees. It prevents our best varieties from degeneration — and prevents best varieties from relapsing into degenerate, weak strains.

It preserves the habits of heavier annual yields of better colored fruit, ideal shape, larger size and other better characteristics—and, thus, **assures better fruit, bigger crops and greater profits to those who plant Stark Trees.**

Every Farmer Knows This To Be A Fact

In these days, every farmer and stockman now knows that he gains bigger crops from superior seed—gets finer stock from thoroughbred or pedigreed parents—and, while trees are not the product of two parents, their propagation from a Stark "Record-Bearing" Strain Parent Tree is of vast importance and of **GREATER VALUE** to the man who wants assurance of a reliable source of the best fruit trees and the biggest profits.

It Makes More Certain "True-to-Name" Trees

Our system of propagating **ONLY** from Record-Bearing Parent Trees of each variety, minimizes errors in propagation and, thus, is double assurance that **EVERY** Stark Tree is a True-To-Name tree.

A leading Editor writes: "It is a fact that your house is one of the very few that have kept their stock pure and straight. I do not recall a single instance where it was claimed your stock did not turn out true to name."

Prof. Shamel, U. S. Department of Agriculture, Demonstrates This Method

Prof. A. D. Shamel, in charge U. S. Govt. Fruit Improvement Investigations, is noted throughout the World as the Foremost Authority on Bud Variation and for the wonderful benefits he brought Fruit growers through his splendid work on bud variations in various branches of Horticulture. His work for citrus growers alone saved millions of dollars. Prof. Shamel states:

"The work of searching out such valuable new improvements as your bud sport Starking and other superior variations of standard varieties is of great value to the fruit industry. **These improvements** in color, size, shape of fruit and increased production, as well as other important characteristics, **can unquestionably be reproduced by propagation from these known superior strains.** On the other hand, drone or poor bearing strains also occur and careful, intelligent, parent-tree **selection will eliminate inferior strains** from propagation and will result in better fruit and **more profit for fruit growers.** Our experiments and observations for twenty years have definitely proved these facts, and the fruit growers are realizing more and more the vast importance of obtaining trees propagated from these superior strains."

Remember, it has taken our Staff of Scientific Horticulturists nearly 30 years of continuous work and search to finally arrive at the point where we are able to offer Stark "Record-Bearing" Strain Trees in every variety. Growers should, therefore, be very cautious about bogus so-called "Superior" strains, offered by those who have not the facilities for the great and costly work and who have **not** spent years and years in searching out and investigating the records of the Parent Trees from which they propagate.

Date________________ **STARK BRO'S NURSERIES, Louisiana, Mo.**

Subject to terms and conditions of your current Price List and the following Agreement, ship Nursery Stock as listed, for which I enclose $________________

The following agreement, between the undersigned and Stark Brothers Nurseries and Orchards Company, of Louisiana, Missouri, refers to the purchase by the undersigned of STARKING (Trade-Mark) (Stark Bro's Double-Red Delicious) apple trees and (or) GOLDEN DELICIOUS (Trade-Mark) apple trees and (or) STAYMARED (Trade-Mark) apple trees and (or) HAL-BERTA GIANT (Trade-Mark) peach trees and (or) any of the LUTHER BURBANK NEW TREE OR PLANT VARIETIES. Owing to the great expense of the wide-spread testing and investigation of these valuable trees and plants, and the great cost of their introduction, Stark Brothers Nurseries and Orchards Company is protecting itself as well as the public from the imposition and substitution often practiced by unscrupulous dealers. This is intended to prevent fakers from misbranding and marketing inferior fruits as genuine. Furthermore, this will enable growers who purchase Genuine Stark Trees or plants of the above named varieties to reap the reward of the high price on the markets for the fruit of these high quality trees and plants without having the damaging influence of bogus and inferior sorts which may be attempted to be marketed as genuine. Thus the reputation for long keeping, high quality and big profits of these fruits will be maintained and protected by the cooperation of Stark Brothers Nurseries and Orchards Company and the purchasers of any of the above named varieties. Therefore, in consideration of the agreement of the undersigned not to give away or sell or permit anyone else to give away or sell or to take these STARKING (Trade-Mark) apple trees and (or) GOLDEN DELICIOUS (Trade-Mark) apple trees and (or) STAYMARED (Trade-Mark) apple trees and (or) HAL-BERTA GIANT (Trade-Mark) peach trees and (or) any of the LUTHER BURBANK NEW TREE OR PLANT VARIETIES or their progeny or scions, buds or cuttings from these trees herein mentioned or their progeny or any other STARKING (Trade-Mark) apple trees and (or) GOLDEN DELICIOUS (Trade-Mark) apple trees and (or) STAYMARED (Trade-Mark) apple trees and (or) HAL-BERTA GIANT (Trade-Mark) peach trees and (or) any of the LUTHER BURBANK NEW TREE OR PLANT VARIETIES or their progeny that may be furnished to the undersigned in the future by Stark Brothers Nurseries and Orchards Company for a period of twenty-five (25) years after any such trees and (or) plants are so furnished and the further consideration of the sale of any of the foregoing trees and (or) plants named in this purchase agreement, Stark Brothers Nurseries and Orchards Company, agrees to furnish the varieties named in this purchase agreement, which are herein ordered, to the undersigned. The undersigned agrees that in case of disposition of the property on which any of the varieties, named in this purchase agreement, are planted to make this agreement a condition of the transfer. In the event that any nursery stock sold by Seller Company proves untrue to name as labeled, Seller Company agrees, on satisfactory proof to it of such untrueness to name, to refill that portion of the order so proven to it to be untrue to name, or, at its option, to refund the purchase price paid therefor, and as the Seller Company does not give any warranty, express or implied, in respect to any nursery stock sold by it, the purchaser's, or any one else's damages, if any, for any breach of this contract, or any special contract herein contained, by Seller Company, shall be limited to the refilling of that portion of the order, or to the refunding of the purchase price paid therefor, as above stated. I have read, understand and hereby agree to all these agreements and terms of sale.

DO NOT WRITE IN THIS COLUMN						

FOR BIG PROFITS --- Plant An Orchard NOW

Here is a table showing why NOW IS THE BEST TIME IN 35 YEARS TO PLANT FRUIT TREE ORCHARDS. These actual figures put out by the Bureau of Railway Economics, Washington, D. C.

Number of bearing age trees in U. S.:

In 1899 — 201,795,000 bearing fruit trees
In 1909 — 151,323,000 bearing fruit trees
In 1919 — 115,309,000 bearing fruit trees
In 1924 — 103,697,000 bearing fruit trees

A loss of 98,098,000 Bearing Trees in 25 years. During this 25 years, our population has jumped many millions.

Official figures issued by the U. S. Department of Agriculture (based on 1930 census) show that there are 35,000,000 fewer apple trees in the United States than in 1920 —

A decrease of 25% in 10 years in the number of apple trees, with Peaches and other fruits in proportion.

This enormous decrease in the number of fruit trees, combined with the greatly increased population (an increase in the last 10 years of approximately 17,000,000) assures both the home orchard planter and the commercial orchardist of more profits than ever before.

The man who plants an orchard of high quality fruits NOW will make big profits during the next 20 years.

Plant a Home Orchard of varieties ripening in succession—for fresh fruit continuously from earliest to latest.

Stark's NEW LOW PRICE List

NO RAISE IN STARK PRICES YET. We are still selling at the same lowest depression prices in a decade, except Peach and a few very scarce items. All Fruit Trees are scarce. BUY NOW Before Prices Advance. Prices Subject to Change Without Notice.

Stark Bro's "RECORD-BEARING" Strain Trees

WE PAY FREIGHT Express or Parcel Post On $20 and Up

Cash Orders at Prices in this Price List, except in states of Wash., Ore., Ida., Calif., Utah, Ariz. and N. Mex. where We Pay Freight on $25 and up Orders. We will use our judgment as to best method of shipment. On ½ Price Demonstration Orchard Orders, Customer Pays Freight. **SEE PAGE 28.**

TERMS. All cash with order — except on large orders of 50 trees or more. On orders of 50 trees or more, to parties known to us to be reliable and well-rated, we will accept 10% cash with order, remainder upon arrival.

HOW TO FIGURE PRICES

"Kind" means "family"—apple, or pear, or cherry, or peach, etc.

"Variety" means "name"—Starking, or Lincoln, or Montmorency Stark, or Hal-Berta Giant, etc.

See next Page for Rates on Grapes and Berries.

EACH RATE: 1 to 10 trees, shrubs, roses, etc., sell at each rate. (*No matter how many different varieties.*)

10 RATE: 10 to 30 of a "kind" sell at 10 Rate. (*No matter how many different varieties*).

100 RATE: 30 to 50 of a "kind" sell at 100 Rate. (*No matter how many different varieties*).

Write **WHOLESALE** Dept. for **Quantity Prices** on **50 TREES** or more. Use **POST CARD** enclosed.

On Orders of 50 Trees or More

Write Our WHOLESALE DEPT. For SPECIAL QUANTITY PRICES. Use POST CARD Enclosed.

MONEY BACK. In the event that any nursery stock sold by Seller Company proves untrue to name as labeled, Seller Company agrees, on satisfactory proof to it of such untrueness to name, to refill that portion of the order so proven to it to be untrue to name, or, at its option, to refund the purchase price paid therefor, and as the Seller Company does not give any warranty, express or implied, in respect to any nursery stock sold by it, the purchaser's or any one else's damages, if any, for any breach of this contract, or any special contract herein contained, by Seller Company, shall be limited to the refilling of that portion of the order, or to the refunding of the purchase price paid therefor, as above stated. Non-delivery of stock is excused in case of fire, frost, floods, drouth, strikes, shortage of nursery stock or other causes beyond seller's control.

WE REPLACE FREE As Follows: Stark Bro's desire is to satisfy every customer — that has been our policy for 119 years. We guarantee Stark Nursery Stock to reach the customer in good condition, and we will refill absolutely free any stock that does not reach customer in good condition, *provided we are notified immediately on arrival of order* so that we can make claim with the railroad or other transportation company. We do not replace nursery stock that fails to live. Possible neglect of planter and unavoidable climatic conditions prevent guaranteeing trees and plants to grow.

GET UP CLUB ORDERS — GET 10% FREE TREES — FREE FREIGHT

GET UP CLUBS among your neighbors and save money for each one — Get **FREE TREES** (where total Club orders amount to $20.00 or more); Get **lower rate and Free Freight** for larger quantity, etc. For your trouble **ADD** to the Order **FREE** of charge **Trees to the amount of 10% of Club Order.** These extra trees should go to the Club Maker, but of course may be divided.

INSPECTION. The Certificate of our State Entomologist is attached to all shipments. No diseased or infested trees are permitted in our nurseries.

PARCEL POST ORDERS. We can ship 3 to 5 ft. size trees or smaller by parcel post. Also grape vines, berry plants and small size Ornamentals.

PLANTING DISTANCES

APPLE—20 to 40 ft. apart.

A Home Orchard Will Feast YOUR Family

Home Orchard of G. B. Mays, Champaign Co., Ill., All Record-Bearing Strain Stark Trees. Last Year He Sold 47 bu. Of Cherries, 54 bu. Of Plums and 90 bu. Of Apples Besides All The Family Ate and Put Up For Winter Use. This Little Orchard-Vineyard Has Netted Him About $700.00 Profit Per Year For Years.

You have enough spare ground in your Home Yard or Farm to set out one of the home orchards offered below of a few trees that will bear all the fruit from early to late each season that your family can eat — plenty to "put up" for the balance of the year — and, **lots more that you can sell on a roadside stand or in nearby towns** — often paying for the trees with the first crop.

As Prof. T. J. Talbert, Missouri State Horticulturist, stated in the **Kansas City Star of March 23, "A Small Orchard Will Prove An Asset To The Farm."**

Prof. Talbert goes on further to say: "Many think that the home orchard will require an undue amount of work. **This is not true for the home orchard of one acre or less.**

"The prospective home orchardist should keep in mind the **MAIN OBJECT OF THE HOME ORCHARD IS TO SUPPLY ENOUGH FRUIT FOR THE FAMILY.** With proper care and attention, no similar area on the farm will produce for the time and labor employed as great returns to the **yearly food supply** of the family as the home orchard."

The "one crop" farming idea has been banished. All wise farmers know that they should raise some hogs, cattle, poultry and that they should plant other crops besides just corn or wheat. The basic idea of **RAISE MOST OF WHAT YOU EAT RIGHT ON YOUR OWN FARM** has again become the motto of shrewd farmers — for both health and economy. No farm is complete without a home orchard.

Orchard Experts selected the varieties in these Splendid Collections. If any variety becomes exhausted they will include a similar sort of equal worth.

No. 4 Collection:

"Big Leader" Orchard

$10 — For $14.25 Worth — You SAVE $4.25

All Are Leading Varieties.
All Big 4 to 7 ft. Size Trees

- 1 Starking (T-M) Apple
- 1 Golden Delicious (T-M) Apple
- 1 Double-Life Grimes Golden Apple
- 1 Stark Delicious Apple
- 1 Jonathan--Early Bearing--Apple
- 1 Lincoln Pear
- 1 Stark Early Elberta Peach
- 1 Hal-Berta Giant Peach
- 1 Stark Gold, Hardy, Sweet Cherry
- 2 Montmorency Stark Cherry

No. 1 Collection:

Golden Apple Orchard

$5 — For $7.90 Worth — You SAVE $2.90

All Big 4 to 7 ft. Size Trees

- 2 Stark's Golden Delicious
- 1 Henry Clay (T-M)
- 1 Yellow Transparent
- 1 N. W. Greening
- 1 Banana
- 1 Grimes Golden (Double-Life)

No. 2 Collection:

Red Apple Orchard

$5 — For $7.80 Worth — You SAVE $2.80

All Big 4 to 7 ft. Size Trees

- 2 Starking (T-M)
- 1 Winesap
- 1 Stark Delicious
- 1 York Imperial
- 1 Jonathan (Young-Br.)
- 1 Stayman Winesap

BOTH No. 1 and No. 2 above Golden and Red Apple Orchards For ONLY $9

Worth $15.70 — SAVE $6.70

Free Planting Plan comes with each order for Collection No. 11

No. 11 Collection:

New "Back Yard" Orchard

$12 —For $17.65 Worth—You SAVE $5.65

All Big 4 to 7 ft. Size Trees

- 1 Golden Delicious
- 1 Starking Apple
- 1 Stark Delicious Ap.
- 1 Henry Clay
- 1 Jonathan Apple
- 1 Stark Ey. Elberta
- 1 J. H. Hale Peach
- 1 Hal-Berta Giant
- 1 Mont Stark Cherry
- 1 Suda Hardy Cherry
- 1 Stark Gold Cherry
- 1 Lincoln Pear
- 1 Bartlett Pear
- 3 Grapes — 1 Red, 1 White, 1 Blue

-Crowned King of ALL Red Apples

Starking Sales NOW 405% Greater Than Delicious

THOUGH introduced less than a generation ago, Starking is already far out-selling old Delicious **because Far-Seeing Orchardists realize that Starking is a Vastly Improved Delicious.**

Last season, we sold 405% more Starking trees than old Delicious trees—and Delicious has for years been by far our best seller.

Growers who **plant for profit** have planted and are planting Starking by the tens of thousands. In the Greatest American orchards, where Stark Delicious has for years been the GREATEST PROFIT MAKER for growers, Starking is being planted as no other apple was ever planted before!

Bore 2½ Bushels per Tree!

"Leading orchardists are more enthusiastic than ever over Starking, not only because of its WONDERFUL COLOR AND SIZE of the apple, but the tree's ability to BEAR MUCH YOUNGER THAN DELICIOUS."

"STARKING apples **SELL AT A GOOD PREMIUM OVER DELICIOUS**—and the Delicious has heretofore been the highest selling and most popular red apple ever planted!

"Compared to other strains of Delicious, I consider STARKING Far Superior to All Others."

$3.00 per Bu. in N. Y.

Geo. T. Skiff, who has 250 young Starking trees in his fine orchards in Onondaga Co., New York, enthusiastically reports:—

> "My 250 Starking trees bore much younger than Delicious begins to bear, as a rule. All the apples are highly colored—No. 1 Extra Fancy for color and my customers are just crazy about them. **Have sold these apples for $3.50 a bushel.** I find the Starking a **good keeper** and the tree is surely a **young and heavy annual bearer.**"

Bore 50 at 2 Years

From Alabama, H. A. Norris, Marshall Co. orchardist, sends this report:—

> "The Starking trees I planted 2 years ago bore 50 apples this year."

As the trees grow older the yield increases with startling speed. For instance, look at this report from A. S. Phleger, Giles Co., Virginia:—

> "I harvested 110 bushels of big, superbly colored Starkings from 144 young 3 to 4 year old Starking trees this year. They make a wonderful pack and the quality is unexcelled."

Far Younger Bearer Than Delicious

When we first introduced Starking over a decade ago, we did not claim that it would bear younger than old Delicious. But fruit growers who planted Starking trees soon discovered that **Starking trees came into bearing much younger than Old Delicious.**

I gathered 900 bushels of fine, big, beautifully colored Starking apples from my 700 young trees this year. **All of them began to bear 2 to 3 years younger than old Delicious.**—L. A. Cather, Marion Co., W. Va.

Picked my first crop from my 120 Starking trees when they were only 3 years old. All of them graded No. 1 Extra Fancy for color. This earlier, All-Over-Red Coloring makes them highly desirable in the eyes of the public and they always sell for high prices.—T. H. Miller, Yell Co., Ark.

I find that my Starking trees begin bearing 2 years younger than old Delicious. My 600 Starking began bearing at 4 years. The apple has **higher quality and juicier flavor than** old Delicious.—G. C. Hitchings, Onondaga Co., N. Y.

I have about 100 Starking trees that **began bearing when 3 years old**—about 2 years younger than Delicious usually bears. It is very much more desirable than old Delicious. The apples always sell very much higher than Delicious because of the more attractive coloring.—J. A. Keyser, Rappahannock Co., Va.

Proved Best From Virginia To Oregon

THOS. J. HARWELL, King William Co., Va., noted orchardist, writes: **"My Starking began bearing at 4 years.** Last year (their 6th year) they had a good crop—size large, color perfect, **brought $2.75 per bushel.** They came back with another full crop this year, and I have already shipped two cars to New York. Apple men tell me there are **no more beautiful apples in that city.** I have found Starking a very vigorous, hardy tree—and it eliminates the faults of old Delicious, especially poor color."

ARTHUR FOREMAN, Ex-Pres. **Miss. Valley Apple Growers Ass'n.,** wrote: "Starking came through with 100% bright red color, reaching excellent size—in spite of the worst growing season in the memory of the oldest settlers. I can't conceive of anyone planting old Delicious when they can get such **wonderful results with STARKING.** What amazes me is the fact that **apples in the densest shade are just as bright red as outside apples.** Anyone growing Starking need never worry about selling—**they sell** themselves."

CHAS. RUMBOLZ, famous orchardist of Okanogan Co., Wash., writes: "From 200 Starking trees only 8 years old, we packed 2,436 boxes—12.18 bushels per tree—THE MOST REMARKABLE YIELD I HAVE EVER RECEIVED FROM ANY 8-YEAR-OLD TREES." When J. C. Norris, Inspector and widely known authority, saw Mr. Rumbolz's fruit, he wrote: "I could have stayed there forever—I can't tell you—can't describe the scene—3600 bushels of THESE IMMENSE SOLID RED STARKING. It is destined to make a complete revision of orchard planting in America."

Will be Great Money-Maker for Growers

That was predicted a decade ago by the State Horticulturists, Government Pomologists and Orchardists who inspected the Original Starking Tree years before we ever introduced this variety to the world. These predictions are being more emphatically proved every year—especially during the year of the Greatest Drouth in the History of America.

Starking is far ahead of old Delicious in every way. **My Starking trees bore 3 years younger than Delicious.** In my opinion, the old Delicious will be mighty hard to sell when there is enough Starking on the market to supply the demand.—W. R. Wessel, Lafayette Co., Mo.

My 400 young Starking trees bore from 5 to 7 bushels each and **sold for $3.50 per bushel.** They always bring the top price on every market.—R. L. Wallace, Harriman Co., Tenn.

Growers who plant Starking now will reap more than double the profits to be made raising old Delicious.—J. R. Perkins, Big Warrior Orchard, Walker Co., Ala.

The earlier 100 per cent **ALL-OVER-RED** color of Starking makes it a very much more desirable apple for growers than old Delicious. It is **superior to any other apple** and I wish that my 500 Delicious trees were all Starking. I have 200 Starking trees that **began to bear 3 years younger than old Delicious.**—James Sharpe, Morris Co., Kansas.

Every Apple on the Trees EXTRA FANCY

The fact that **ALL** the apples on Starking trees become a uniform, deep crimson-red **ALL OVER** amazes experienced apple men. Even the fruit on the inside, shaded limbs becomes **solid** red when Delicious is still half green. **"The color of the Starking apples even from the most shaded portion** SHOWED MORE COLOR THAN IS NECESSARY FOR EXTRA FANCY GRADE!" declared Prof. Roy E. Marshall, Assoc. Prof. in Horticulture, Michigan State College.

The color of all my Starking apples is wonderful. People just MARVEL at their uniform all-over-red color. Many of my 125 Starking trees were LOADED EVEN AFTER THE TERRIBLE DROUTH SUMMER!—W. W. Kercher, Prop. Sunrise Orchards, Elkhart Co., Indiana.

My 300 young Starking trees bore 200 bushels of big, uniformly ALL-OVER-RED apples last year, **despite the drouth!** They began bearing 2 years younger than Delicious.—W. B. Barrow, Wake Co., N. Car.

All apple buyers are delighted with the **uniform higher color** of Starking apples. Furthermore, Starking trees are better shaped, with stronger, wider crotches and of better spreading habit than old Delicious.—B. R. Williams, Washtenaw Co., Michigan.

The GREAT majority of my Starkings always grade No. 1 Extra Fancy for color. I picked 500 bushels from my young Starking trees this year.—A. F. Johnson, Campbell Co., W. Va.

Hardy in North—Succeeds in South

Starking thrives, grows fast, bears young, yields big crops annually in practically every section of the United States. It is rapidly superseding other red apples in orchards everywhere.

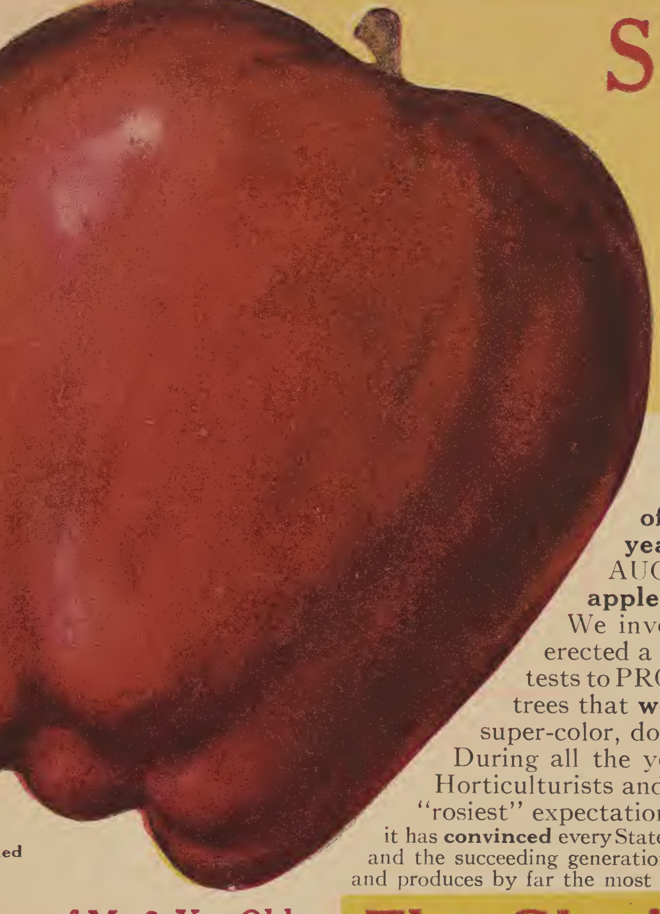
There is no comparison between old Delicious and Starking trees here in New England. Last year we had a very severe winter but **there was no winter injury on my young Starking trees,** while thousands of Baldwins were **ABSOLUTELY KILLED. All my 450 Starking trees bore fine crops this year.**—K. Y. Taylor, Franklin Co., Mass.

My Starking trees began to **bear 3 years younger than old Delicious.** The earlier and all-over-red coloring of Starking makes it a far more profitable apple for the grower.—R. D. Kohne, Lucas Co., Ohio.

Despite the drouth, many of my young Starking trees **bore 2 barrels** (6 bushels) **each this year of fine Extra Fancy No. 1 apples.** The entire crop was 100 per cent all-over-red the first week in September. The crop was remarkable because **these Starking trees withstood a 20 degrees below zero** spell last winter!—D. Gold Miller, Berkeley Co., W. Va.

All my Starking trees began bearing at least one year younger than Delicious. **All of them withstood the terrible drouth splendidly** and bore good crops.—C. McCurdy, Oakland Co., Michigan.

Actual Size Average Starking Apple



Genuine STARKING Apple Trees Can Be Obtained ONLY from Stark Bro's

STARKING ..the Sensational New Double-Red Stark Delicious

Sold ONLY by Stark Bro's

A NOTED Horticulturist told us, some years ago: "A New Jersey Orchardist has an amazing Stark Delicious tree. **One limb of this Stark Delicious tree is loaded every year with apples that get** RED ALL OVER IN AUGUST, **a month before ripening, when the apples on the other limbs are still green!"**

We investigated and **bought this tree for $6,000.00,** erected a cage around it for protection and began a series of tests to PROVE that scions cut from that limb **would** produce trees that **would** bear apples having that same early-coloring, super-color, double-red characteristic.

During all the years of tests and inspections by scores of State Horticulturists and noted fruit Growers, STARKING exceeded the "rosiest" expectations of all of us—has performed in such a way that it has **convinced** every State and National Horticulturist who has seen the Original Tree and the succeeding generations of STARKING trees, that **it is a true bud-sport—** and produces by far the most superior strain of the famous Delicious apples.

"Every One of My 3-Yr.-Old Starkings Bore This Year!"

—reports Jos. A. Richartz, of Yakima. "The photos of my 3-year-old Starking trees show the magnificent crops that EVERY ONE of these trees bore this year —and EVERY apple had 100 per cent color—even those on ends of limbs bent to ground and entirely covered in the alfalfa. **All the apples were LARGE—most of them running** 64, 72 and 80 to the bushel.

Leading orchardists in this section are more enthusiastic than ever over Starking, not only its wonderful color and size but its ability to **bear considerably younger than Delicious.** Mr. Curtis Aller, Mgr. Yakima Fruit Growers Association visited my orchard a number of times and was very enthusiastic over the **splendid size, color and young bearing of Starking.** (Note—The Yakima Fruit Growers Association—"The Big Y"—has since ordered over 20,000 Starking Trees from us.)

"Shows Even More Color than Necessary for Fancy Grade!"

That's the positive statement of Prof. Roy E. Marshall, Assoc. Prof. in Horticulture, Michigan State College.

"The color of the STARKING apples even from the most shaded portion of the limb showed more color than is necessary for EXTRA FANCY GRADE.

"STARKING is a bud sport of Delicious having every tree and fruit characteristic of the latter, **PLUS SOLID RED COLOR.** It should yield like Delicious, **grade out better and command even better prices on apple markets than Delicious."**

The Glorified Red Delicious

STARKING is an extra large, RED-ALL-OVER apple, with the five-knob characteristic of Stark Delicious. Its complete, full-red skin attracts buyers in every market. Its crisp, juice-laden, tender flesh is of wonderfully delightful flavor—a flavor that is aromatic—spicy—tangful.

As one fruit connoisseur has stated, "Starking apples possess the champagne of all apple flavors. No other red apple begins to rival its rich quality."

Furthermore, Starking apples **retain** their crispness and enticing flavor even after long storage. This is because of its unique habit of **COLORING ALL OVER** weeks before Delicious obtains the right color for picking. **It can be picked FULL RED weeks before Delicious is half red on the tree.** Old Delicious must be picked half-red before it is fully colored to "stand up" in storage.

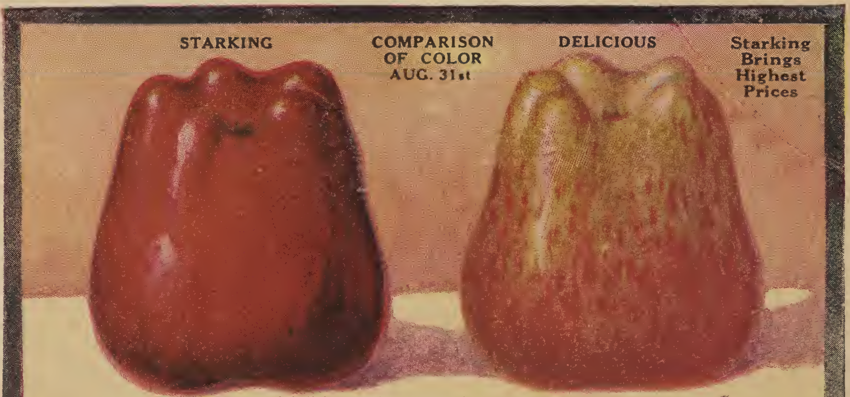
Starking apples do **NOT** get mealy because they can be picked fully colored when "hard ripe"—keep until late Spring.

"Won't Get Mealy!"

Prof. J. H. Gourley, Ohio, Chief Horticulture Dept. states:—"The Starking guaranteed red color assures fruit growers:—Early Picking, Firmer Fruit for **Longer Keeping** and Better Quality over a Longer Storage Season." (Won't Get Mealy.)

"STARKING — A Super Delicious!"

Prof. T. J. Talbert, Mo. State Horticulturist states:—"I have seen Starking and **marveled at its early color** (in Aug.). It is a super-Delicious and will keep far through the winter **WITHOUT BECOMING MEALY!** It will be outstanding as a leader."



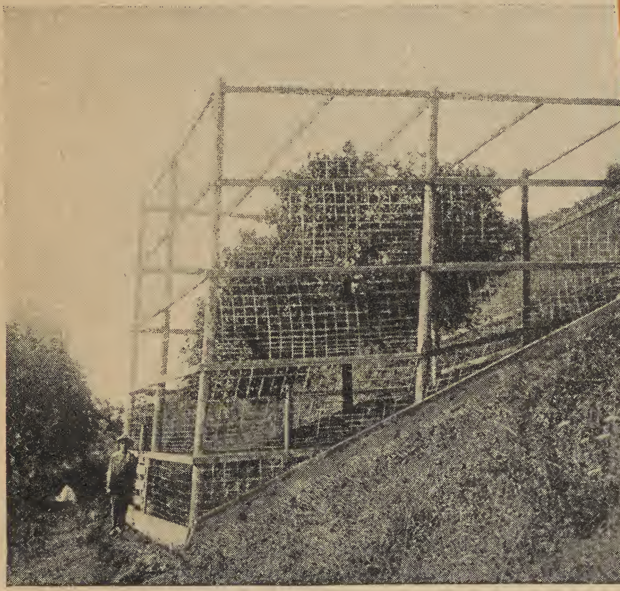
STARKING "Double-Red" Delicious, (*left*) not ripe but already **RED.** Regular **DELICIOUS,** (*right*) still **GREEN.** Both picked same day, (Aug. 31st), same orchard. Starking gets red long before it ripens, can be picked while "hard ripe", hence keeps juicy months longer.

GENUINE Golden Delicious Trees Sold ONLY by Stark -- BEWARE of Imitation "Yellow" Delicious

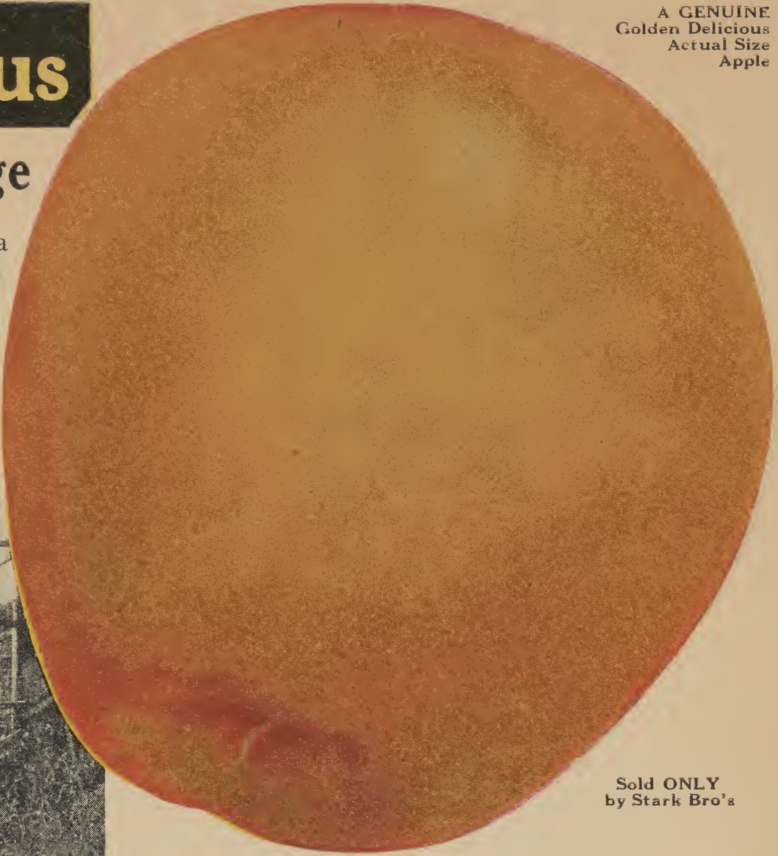
Golden Delicious

..the $5,000 Tree in a Cage

This tree in a cage on a rocky West Virginia mountainside is the ORIGINAL Stark's Golden Delicious tree. We paid $5,000.00 for this tree and the ground on which it stands. This is the PARENT TREE of all Genuine Golden Delicious trees. A. H. Mullins, in whose orchard the tree was found, is shown standing beside the cage.



Original Golden Delicious Tree—The $5000 Tree in a Burglar Proof Cage



A GENUINE Golden Delicious Actual Size Apple

Sold ONLY by Stark Bro's

Beware of Bogus Golden Delicious

Some people offer "Yellow Delicious" trees which they claim are "same as Stark's Golden Delicious." Here is one such case.

Judge Julian Shackleford, Buchanan Co., Mo., states:

"I was told that another nursery could supply me Golden Delicious trees under a similar name. When these trees bore, I found them ordinary yellow apples far inferior to Golden Delicious both in flavor and appearance."

The Quest of the Golden Apple

By Paul Stark

The first "clue" came to us one April day some years ago. Three wonderful yellow apples reached us from a West Virginia mountaineer-orchardist—who wrote that they were a new, heretofore unknown, variety.

The second "clue" came when my brother, Major Lloyd Stark, bit into one of the Golden apples. The flavor amazed him. These apples **looked** like Grimes Golden—**but tasted like Stark Delicious!** They were shaped like Stark Delicious. And they were **in perfect condition in April!** Grimes Golden would have been rotted and gone months before.

One apple was sent to Col. Brackett, U. S. Pomologist at Washington, D. C. Friends present at the time told us how the Colonel came hurrying into the office, a little slab of this wonderful yellow apple perched on his knife blade, exclaiming, "Taste **this!** Here's an apple with a far **better flavor** than Grimes Golden."

That fall the writer started on "The Quest of the Golden Apple."

A 1,000-mile railroad trip, plus a 20-mile horse-back ride through West Virginia mountain wilds, brought me to the farm of Mr. A. H. Mullins.

Back of the house I saw an orchard. But—here came the dismal disappointment! Every tree I could see was nothing but a wild seedling—miserable runts.

Dejected and sick at heart, I turned around to leave—when—I SAW IT!

There, looming forth in the midst of many small, leafless, barren trees, was a tree with rich green foliage that looked as if it had been transported from the Garden of Eden.

That tree's boughs were bending to the ground beneath a **tremendous crop of great, glorious, glowing, golden apples.**

I started for it on the run. A fear bothered me, "Suppose it's just a Grimes Golden tree after all." I came closer and I saw the apples were 50 per cent larger than Grimes Golden. I plucked one and bit into its crisp, tender, juice-laden flesh. Eureka! I had found it. The long sought for **perfect** yellow apple had been discovered. The "Quest of the Golden Apple" had finally reached a successful end.

"Finest Flavored Apple in ALL the WORLD!"

"Golden Delicious is the finest flavored apple in all the world." It is a remarkably Large, Late Winter, Waxen-Golden Apple with a rich, alluring beauty that tempts the buyer and **commands Record-Breaking High Prices on every market every year.** A great commercial and family apple "ONCE TASTED, ALWAYS WANTED!"

It is supreme as an eating apple—and perfection for cooking, canning and cider.

Golden Delicious averages as large as Red Stark Delicious. A FAR SUPERIOR KEEPER to Grimes. It is a big, glossy, Golden Yellow apple, slightly conical in shape (somewhat like Stark Delicious), is blessed with a Rich, Creamy Yellow Flesh, suffused with a slight hint of Oranges—Crisp, Firm, with a Sparkling, Tangful Flavor much like that of a crisp, perfect Bartlett Pear. No apple ever known or grown has so instantly caught the public's favor—BECAUSE OF FLAVOR!

You Can Obtain Golden Delicious Trees ONLY from Stark Bro's

See Color Photo on Front and Back Cover

GOLDEN DELICIOUS—Youngest

Trade-Mark Registered

$2400.00 Crop From 122 Young Trees

(See color photograph of one of these trees on front and back covers)

Les Anderson of Pike Co., Illinois, planted 122 Golden Delicious trees on 2½ acres of his farm just 11 years ago. During the **worst year of the Depression**—when prices of everything were lowest in generations, **HE PICKED A $2400.00 CASH CROP FROM THESE 122 YOUNG TREES**—1,400 bushels of big, gloriously beautiful Golden Delicious apples that eager buyers purchased before the crop was ready for picking.

He declares:—**"I would have had to plant 266 acres of corn the same year to bring me the same money."**

This year, the same 122 Golden Delicious trees on this 2½ acre patch of land will **yield 2000 bushels of fancy quality Golden Delicious apples, which will sell quickly for $4000.00!**

If **YOU** have a few idle acres on **YOUR** farm, you will profit by following Mr. Anderson's example and set out an orchard of Genuine Golden Delicious trees. **No other crop will pay you so much money year after year as Golden Delicious trees.**

To see Les Anderson's Trees—Look at FRONT and BACK covers of this book at same time.

"Finest Flavor In The World!"

No other yellow apple ever discovered even compares with Golden Delicious in size, beauty and flavor. "It has all the savor of a crisp, perfect pear!", declared one of America's greatest fruit authorities.

It has become the **National Favorite** even though 20 years ago it was unknown. Today Golden Delicious trees are being planted in every good orchard in the land and these big, glorious golden apples are to be found in all the principal fruit stores of America, where they always command the highest prices and make the largest sales.

Furthermore, Golden Delicious trees are the **Youngest Bearing Apple Trees** ever discovered. Bore on 2 year old trees in 33 states! Bears big crops every year—and yields more bushels of big, perfect, high-market-priced apples than **ANY VARIETY EVER INTRODUCED IN OUR OVER A CENTURY OF PROGRESS.**

Pre-eminently the **LEADING STARK WORLD'S FAIR FRUIT!**

Grows and Bears Everywhere

A 100 per cent success in every section where apples grow. For the North it has **extreme hardiness**—in the South it is **perfect.** From Maine to Washington it delights growers with **heaviest crops and highest prices.**

Golden Delicious **succeeds where other varieties fail**—30 miles South of Atlanta, 5 and 6 year old trees **loaded** to breaking point.—*J. O. Rutherford, Georgia.*

I got $3.00 per bushel. All new customers come back for more. **A most desirable orchard tree.**—*N. Blanchard, Maine.*

Golden Delicious **Trees hardy. Began** bearing **second year;** have borne regularly ever since.—*A. W. A. Bartlett, Ontario, Canada.*

My crop of Golden Delicious will total **1500 bushels** on 375 trees from 5 to 8 years old.—*J. H. Riggs, Washington.*

One Golden Delicious tree, **3 years old, produced 2 bushels,** 90% extra fancy. —*Geo. Robertson, Texas.*

Have 800 Golden Delicious trees, the **best money maker.** Always sold at a premium.—*R. L. Wallace, Tenn.*

My 30 Golden Delicious will average five bushels per tree—branches **weighted to the ground.**—*J. R. Davidson, Wisconsin.*

Bears Younger Than Any Other Apple

Golden Delicious are often in **profitable bearing** before other varieties produce an apple. **Even at 3 and 4 years** old growers report profitable crops. No other apple will do this.

Have 200 Golden Delicious six and eight years old. **Began bearing at 3 years.** This year a **splendid crop.** Some trees as much as **10 bushels.** Always brings high prices. Particularly **resistant to drouth,** the best variety in this respect, also more **resistant to fire blight.**—*Thomas J. Harwell, Virginia.*

I just picked 65 perfect Golden Delicious apples off of my **3-year-old tree.** —*J. M. Cerny, Missouri.*

My Golden Delicious **bore at 3 years.** They are now eight years old. Last Fall some trees picked 12 bushels. The older the tree, the better the apples. **What a wonderful apple** Golden Delicious is.—*Louis D. Lefevre, New York.*

One of my **3-year-old** Golden Delicious had **45 fine apples** this year. Going through last winter's **20 degrees below zero** weather and several bad **late frosts,** and a **record-breaking drouth.** The only apple that could have stood the test.—*E. R. Gregg, Ohio.*

Far ahead of anything else I have. Set **four years and bearing** first crop.—*A. W. Robinson, North Carolina.*

Am enclosing a photograph of a 3-year-old Golden Delicious **bearing 125** wonderful apples.—*S. H. Summers, Iowa*

Brings Double Prices Everywhere

The market for Golden Delicious apples is growing every year. All over the U. S. A. they are **bringing double and even treble the prices of other sorts.**

All winter and spring, as late as on May 8th, the St. Louis GLOBE DEMOCRAT Market Report quoted these wholesale **prices being paid at that late date by dealers:**—"APPLES—**Illinois Golden Delicious, $3.00 to $3.50 bushel.** Delicious, $1.50 to $1.90; Yorks, selected, $1.10 to $1.25; Ben Davis, $1 to $1.10." etc.

Golden Delicious brings about **double the price of other varieties.** My customers say it is the **best apple of them all.**—*Wm. R. Houk, Indiana.*

If I had planted all Golden Delicious, I would have made **five to ten times as much money** out of my orchard to date.—*Albert C. Smith, Illinois.*

My 120 Golden Delicious 8 or 9 years old produced from 4 to 10 bushels per tree. **I received twice as much as for others.** The tree is better, **more hardy,** will **stand frost** and cold better than others.—*John T. Rader, Mo.*

Golden Delicious **sells at double the price** of others.—*S. J. Metz, Pennsylvania.*

Received **three times as much** for Golden Delicious as others got for other apples. We sold many to chain grocery stores.—*John C. Thomson, Kentucky.*

Make Immense Profits for Growers

The heavy annual bearing of Golden Delicious and the **big premium prices** they always command insure growers **big profits** from their Golden Delicious orchards.

My **50 Golden Delicious** trees eight years old **produced 500 bushels** which were **sold at highest price.** My 4-year-old trees produced this year.—*W. P. Campbell, Iowa.*

My 10-year-old Golden Delicious trees produced **5,000 bushels** and we **get 50c per bushel more than for other varieties. Does not scald** in storage. **Tree bears young.**—*Boyd Richards, Va.*

One of my 9-year-old Golden Delicious bore 10 bushels, one 11 bushels, one 12 bushels. **Averaged me $30 per tree.**—*A. R. Carter, Illinois.*

My 5-year Golden Delicious bore as much as **5 bushels each,** and bring practically **double the price** of other varieties.—*J. S. Wellborn, North Carolina.*

The selling price of my Golden Delicious is about **twice as much as other** varieties. My trees are **4 years old** and have **produced two crops.**—*Jno. W. Lucabaugh, Pa.*

My 500 Golden Delicious 10 years old will **harvest 12,000 bushels.** I market them at **50%** to **100% more** than others. —*E. F. Burgeim, Okla.*

Bear Most Bushels Fruit Every Year

No other variety produces as many bushels of fine fruit **year after year** as Golden Delicious. When trees are only six and seven years old, 5 to 10 bushels per tree is not uncommon.

I have about 250 Golden Delicious ranging from six to ten years old, and these are the only trees out of 264 acres with a full crop.—*T. E. Ball, Illinois.*

The **only trees bearing a full crop** in my orchard are Golden Delicious—many of them 9 bushels per tree. They set fruit **regardless of weather** conditions.—*T. E. Bartlett, Missouri.*

Some of my Golden Delicious ten-year-old **average around 30** bushels. From one tree I picked **44 bushel boxes of apples** last fall.—*Julius E. Ulrich, Wash.*

Have 700 Golden Delicious **6 years** old bearing, some trees **6 bushels.** Best for Georgia.—*M. W. Hall, Georgia.*

Terrible drouth. Most varieties failed. 1200 Golden Delicious six and nine years old bore 10,000 bushels. G. J. Hopkins, Va.

Have 250 five-year Golden Delicious. Yield **heavy crops** of first class apples and **bring best prices.** Some trees produced 5 bushels.—*A. Laudermilk, N. C.*

Have 400 Golden Delicious trees **4 to 6 years old.** Will have from **800 to 1000 bushels.** Quality the best.—*Albert Haessig, N. Y.*

I picked **198 bushels** of most beautiful apples **from 20 trees** 10 years old. **One had 21 bushels;** one had 19; another 21. —*J. W. Hanes, Ohio.*

Make Far Greater Profits Quick

Golden Delicious, because of young bearing, **tremendous annual crops,** and the double premium price the fruit commands, insure the grower **quick profits** and big profits—**yes, DOUBLE profit**—compared with ordinary varieties.

My Golden Delicious trees 8 years old have **been bearing** fruit **since 2 years old.** Have **not missed** a crop. I have **ready sale** for them as fast as I can get them from the trees. Impossible to praise too highly.—*Albert D. Bouland, Ky.*

Have 800 Golden Delicious two to seven years old. They brought 50% more than other varieties. My neighbor **picked 1434 bushels** from 300 ten-year-old trees. **No fire blight.**—*H. F. Scarborough, Illinois.*

I am mailing you photograph of a 9-year-old Golden Delicious that bore 12 bushels of high grade apples this year **when all other varieties failed.** Produced 665 bushels. Golden Delicious leads all apples.—*Edward E. Heid, Ind.*

Golden Delicious **will not blight** like others and fruit **will stand more wind.** My 250 young Golden Delicious are carrying a crop of 750 bushels. Always **received $1 more per bushel** than for others.—*Frank Gahler, Ohio.*

Golden Delicious will make **more money** per acre **than any other apple** —young bearing, long blooming.—*Jas. Sharpe, Kansas.*

See Color Photo on Front and Back Cover

Heaviest Bearer of ALL Apples

$2,947.50 Paid for 1 Car of Apples

The N. Y. Produce News stated:—"At wholesale auction last week, Jos. Sicker (leading N. Y. apple buyer) **paid $2,947.50 for one carload of Golden Delicious apples** (only 736 bushel boxes)—unquestionably the highest price at which a car of apples has been sold! Mr. Sicker said the fancy fruit stores have been asking him for a big yellow apple that would retain its flavor and beauty after long storage (as these apples had, after being in storage about 6 months)".

$3.50 Per Bu.—Wholesale Price in May

Here's amazing **PROOF** of the demand for Golden Delicious apples at big prices—even during the Depression—the lowest apple price year since the Civil War. We quote directly from the Wholesale Market Price page of St. Louis Globe Democrat of May 8:—

"APPLES—quantity prices paid by wholesalers—**Illinois Golden Delicious, $3.00 to $3.50 bushel**—Delicious, $1.50 to $1.90—Stayman Winesaps, $1.15 to $1.25—Yorks, selected, $1.10 to $1.25—Ben Davis, $1 to $1.10."

$1140.00 Crop on 95 Trees, 5 Yrs. Old

Just imagine **JUST ONE ACRE** of young 5-yr.-old Golden Delicious trees bringing $1,140.00 for a single crop in one of the worst apple years in generations! Mr. N. Y. Yates, of Knox Co., Indiana owns that orchard. He writes:—

"I planted 95 Stark's Golden Delicious trees 5 years ago. This year they produced 350 bushels. 270 bushels were Fancy and **sold wholesale at $3.50** per bu. The other 80 bu. were clean, smooth fruit and out-sold my best Grimes Golden. While other varieties did not have much fruit after the spring freeze, **the frost did not hurt my Golden Delicious.**

My sales averaged $12.00 per tree from these 5-yr.-old trees. **They are very hardy trees, do not require much pruning, make a good growth each season and bear full crops young."**

(NOTE—at $12.00 per tree means that these 95 young 5-yr.-old trees, on just one acre, brought $1140.00 in a single year.)

People Go Wild Over Golden Delicious

No market is one-half supplied with Golden Delicious. As people learn of its superb flavor, **they will buy no others**—and they demand them of their dealers. No other apple sells so readily or **at such high prices.**

Certainly an apple of **highest rank.** They set **an apple for each blossom.**—*Ralph May, Michigan.*

It is the **best apple** I have. **Could have sold 10,000 bushels** this year if I had them.—*S. D. Kenison, Arkansas.*

Golden Delicious is the **greatest apple in America.** Last year brought **double the price** of other varieties.—*M. T. Flippin, Tenn.*

I sold my Golden Delicious at $3 per bushel and all my customers want more each year.—*B. C. Thompson, N. Y.*

During 8 years Golden Delicious have out-yielded the Wealthy **four to one**—brought $2.50 per bushel.—*Arno Meyer, Wisc.*

My 235 9-year Golden Delicious are **money-makers.** My **customers prefer them to all others.**—*W. A. Negus, Ohio.*

My customers like Golden Delicious apples better than any other. I get $1 more a bu. than for others.—*Frank S. Foster, Ill.*

Bear Good Crops Every Year—Never Fail

Golden Delicious come through with **big crops despite frosts, freezes, drouths** or unfavorable conditions. They will bear **more bushels** of fruit every year through a period of years, **than any other sort.** No other apple compares with it in this respect.

Golden Delicious have never missed a crop since they came into bearing. When I plant more apples, they will be 100% Golden Delicious.—*R. T. Poole, N. C.*

Trees **loaded every year—never fail.** Customers drive fifty to one hundred miles to get them.—*R. L. Littlefield, Maine.*

My Golden Delicious are 12 years old. Commenced **bearing at 3 years**—and have **never failed**—have borne 12 bushels per tree. Brings 50c to $1 per bushel above others.—*W. B. Landis, Iowa.*

Golden Delicious trees **bear very young** and good **crop every year.** Bring a **premium price** over any apple.—*Joe Fellner, Wisconsin.*

Even this year my 200 Golden Delicious 7 years old bore **500 bushels. Bear every year,** and set fruit **without any other trees to pollenize** them.—*Thurman Miller, Ohio.*

Loaded the last two years and carrying more than ever this year **in spite of hard freezes** when blossoms were open.—*D. H. Brake, Michigan.*

Buyers Beg for Them Everywhere

There are not one-tenth enough Golden Delicious apples grown to supply the heavy demand. **Buyers are eager** to secure them—and **growers do not have to worry** about selling them.

Golden Delicious **selling 10 baskets to 1** against all others, at wholesale and retail here.—*A. Franklin Turner, Illinois.*

Our apples were stored in a very good underground storage. Result: absolutely no loss from shriveling. We got **50% more money** for them than others.—*Stonemill Orchards, Ohio.*

Although we had to market our bountiful crop of Golden Delicious against one of the biggest crops in history, we **sold out at 3 times what others brought.**—*John C. Thomson, Tenn.*

Golden Delicious brings **2 to 3 times the price** of other varieties. Should prove a greater money maker than either Oranges or Grape Fruit in California or Florida.—*E. L. Morris, Tennessee.*

Twelve years ago **I listened to you** and planted Golden Delicious against the advice of old timers. Today with these apples, I do not have competition.—*Elmer S. Snavely, Pennsylvania.*

A strong demand from truckers for Golden Delicious. **Demand getting stronger all the time.** Selling higher than other standard varieties.—*Stillwell Cold Storage Co., Missouri.*

Most Satisfactory Orchard Trees

From every standpoint Golden Delicious trees in the orchard are the **most satisfactory** of all varieties—**Young** bearing, **annual** bearing, **heavy** bearing, strong growth, hardy, frost, blight and disease resistant. Stand 43° Below Zero in Canada.

All the fruit I have except some early apples is Golden Delicious. They are **hardier than others.** This year the crop in this section nearly a failure but **Golden Delicious loaded.**—*A. C. Williams, Ohio.*

I have 350 Golden Delicious trees bearing. In spite of unfavorable pollinating conditions, they **have a full crop** with **other varieties failures.**—*Preston T. Roberts, New Jersey.*

Golden Delicious a **sure bearer** and one of the **best keepers.** Apple crop here nearly a failure but my **7-year-old Golden Delicious averaged about 5 bushels** to the tree. Bringing nearly **double the price** of others.—*N. B. White, Tennessee.*

Golden Delicious most **resistant to drouth and fire blight.** Many strong winds here, but Golden Delicious **hangs on.**—*Frank Olson, Michigan.*

Golden Delicious is very **resistant to drouth and blight.** It is a **late bloomer,** bears young, and I get about **twice as much for the fruit** as for any others.—*A. H. Courtney, Ohio.*

Freezes Do Not Stop Them

Golden Delicious **will stand more unfavorable weather, late frosts** and **severe freezes,** than any other apple and still **come through with a crop.** Growers marvel at their heavy annual bearing.

Almost in a class with Wealthy in **hardiness, vigor** and **healthy** growth.—*John Robertson, S. Dakota.*

We had **four successive frosts** while Golden Delicious were blooming. Some clusters were so frozen that the spur died back to the limb, **yet they produced a crop.**—*W. O. Smith, Kentucky.*

I have 50 Golden Delicious 8 years old that will average 3 bushels per tree. Blossoms of **other varieties were frozen** but **Golden Delicious came through.**—*C. L. Grimm, Pennsylvania.*

250 Golden Delicious in my orchard here came through the coldest winter for 40 years—ranging from 43° below zero here to 55° in the villages. Seem hardy as McIntosh and bear third year after planting, producing nearly 3 bushel each at 5 years.—*A. H. Ingalls, Abercorn, Quebec, Canada.*

Golden Delicious trees hardy, have **frost-resisting** blossoms. Fruit beautiful, uniform shape and supreme for eating.—*L. H. Green, Mich.*

Golden Delicious **heaviest bearer** I have and begins to **bear young.** My 9-year-old orchard is a joy to behold.—*Charles M. Roy, Vermont.*

Keeps Crisp and Juicy All Winter

Golden Delicious is one of the **latest keeping** apples—both in ordinary cellar and cold storage. Comes out in late Spring **crisp, snappy, full of juice** and most delicious even in May and June.

Golden Delicious **best apple** I know and my trees are just loaded. **Good keeper** and the best selling apple.—*Gert Wetzel, Michigan.*

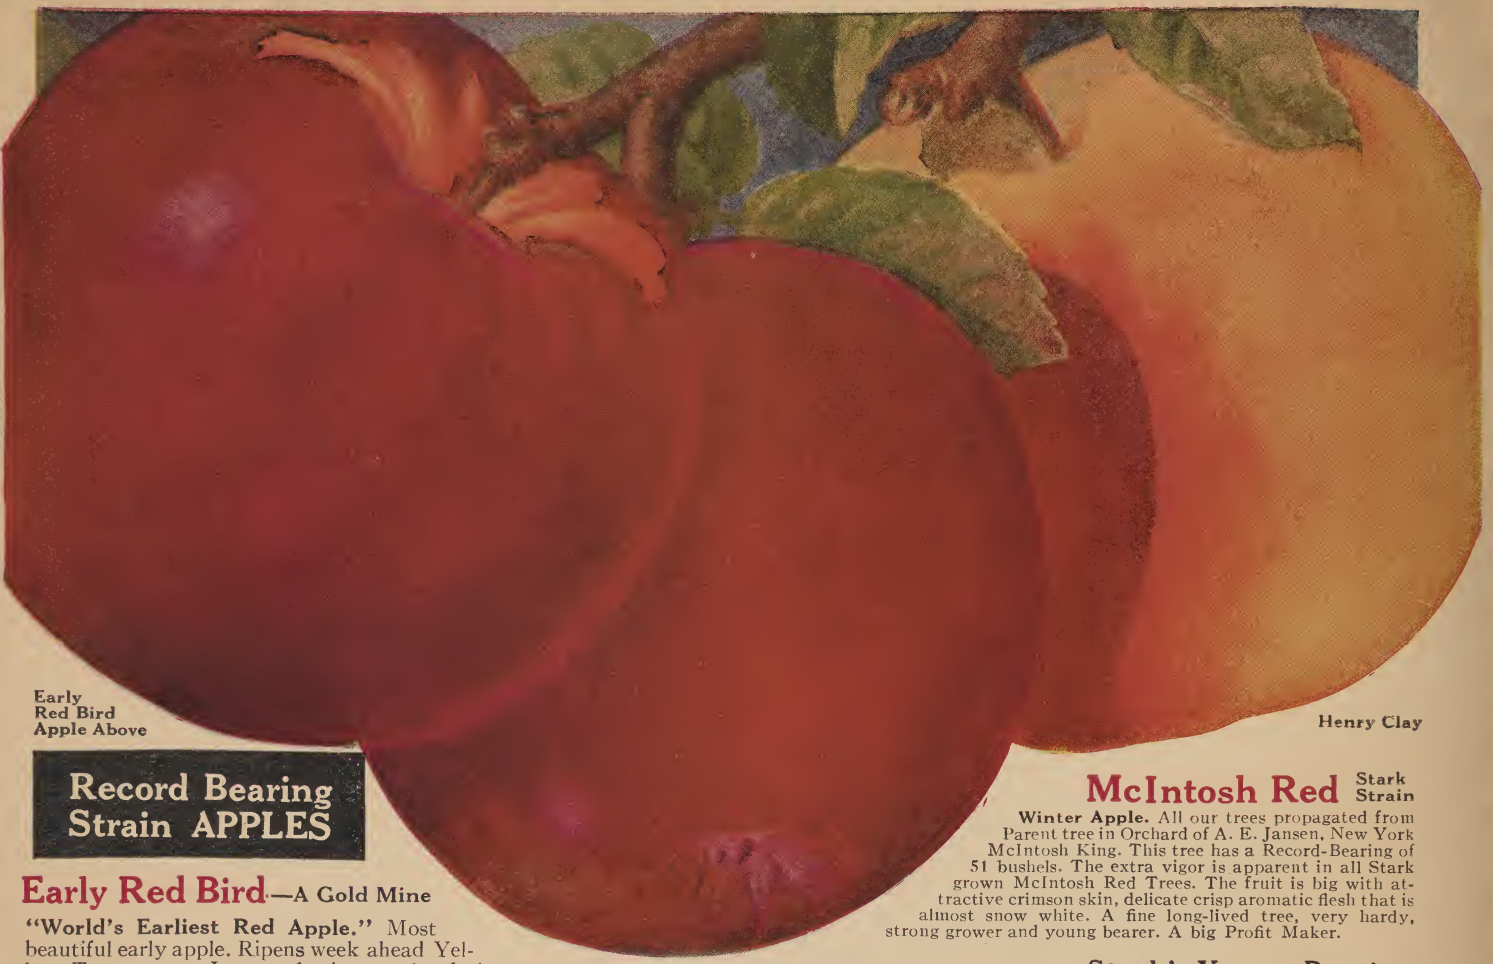
Golden Delicious bears younger and heavier than any other variety, **keeps well** and **has the flavor** of a delicious pear.—*James F. Atterbery, Mass.*

Golden Delicious **lives up to everything you say** about it in your advertisement. My Golden Delicious trees are six years old, bearing full crop.—*A. J. Salinas, No. Carolina.*

When I was President of N. Y. State Fruit Growers, I thought McIntosh in the lead, but I never eat one now when I can get Golden Delicious.—*Clark Allis, New York.*

I sold my Golden Delicious at $3 per bushel. It is the best of all apples for No. Georgia—**earliest bearer, most uniform size, brings highest prices,** yields largest per cent of high grade apples. **Best keepers and highest quality** after storage.—*M. W. Hall, Ga.*

GENUINE Golden Delicious Trees Sold ONLY by Stark -- BEWARE of Imitation "Yellow" Delicious



Early Red Bird Apple Above

Henry Clay

McIntosh Red (above)

Record Bearing Strain APPLES

Early Red Bird—A Gold Mine

"World's Earliest Red Apple." Most beautiful early apple. Ripens week ahead Yellow Transparent. Large, glowing scarlet fruit—best early apple quality. Remarkable, vigorous tree—hardy as an oak—great annual cropper. Our Record-Bearing Strain Early Red Bird Trees are propagated from best parent tree of known record. Prof. Sanders, Canadian Dept. Agric. says: "Earliest apple, young bearer." 15 acres Early Red Bird brought Mr. Shute $10,500.00. Mr. Adney, son-in-law of Originator (Mr. Sharpe of Nova Scotia) says: "Remarkable bearer, extremely hardy, never winter kills. **7 to 10 days earlier than any other apple." Sold ONLY by Stark Bro's.**

Henry Clay

(Trade Mark) **"World's Earliest Yellow Apple."** We propagate our trees through the original Henry Clay Tree discovered in Hopkins Co., Kentucky. Fruit looks like Maiden Blush but ripens 2 months earlier. Larger and better than Yellow Transparent. Ripens crop evenly and fruit can be marketed far earlier than any other yellow apple. Tree strong grower, spreading, regular and abundant bearer. "Most delicious early apple I ever tasted."—R. F. Rutledge, Tenn.

Early McIntosh

(Early Red Eating Apple.) A late introduction—a New, **VERY EARLY** maturing cross between McIntosh and Yellow Transparent. Originated at N. Y. Exper. Station, where it made a great record. Bore wonderfully in Stark-Burbank Test Orchards. Possesses McIntosh color, size and flesh characteristics. Ripens after Yellow Transparent. Great apple to plant to follow Early Red Bird on the high-price early markets.

Wilson Red June

Summer. Sold **ONLY** by Stark Bro's. We propagate all our trees through Original Wilson Red June Tree. Bears immense red-all-over apples, not a sign of stripe. Ripens just ahead of Summer Champion and goes on market when apples are scarce and high priced. Tree very hardy, withstanding hardest winters and coming through with fine crops. Wilson Red June and Summer Champion are undoubtedly the most beautiful summer apples. Sold for $8.00 a barrel.

Summer Champion

Late Summer Apple. Sold **ONLY** by Stark Bro's. We discovered the Original Summer Champion tree and all our propagation is through the Original Tree. Most beautiful, best quality, largest and best shipper of all Summer apples. A brilliant red apple of truly fine flavor. Ripens between Wilson Red June and Wealthy. Tree very hardy, good grower and heavy bearer. An ideal summer apple.

Wealthy

Fall. All our Wealthy trees are propagated from Zuercher's famous Wealthy Parent Tree. Amazingly hardy. Strong tree—bears young and regularly. Disease-free. Long-lived. Fruit brilliant red-striped, medium to large. Wonderful wine-like flavored flesh. Zestful juice. **The Record-Bearing Strain of WEALTHY can be obtained ONLY FROM STARK BRO'S. Most Profitable of all Fall Apples.**

Yellow Transparent

Early Summer Apple. Medium size, golden yellow fruit—hardy, young bearing tree. Our strain best, because propagated from Record-Bearing **OHIO** Yellow Transparent Tree—but, we recommend Henry Clay as better variety.

Double-Red Duchess

Early Summer Apple. A Stark introduction. Twice as red as Old Duchess Oldenburg. A real bud-sport that will bring great profit to Duchess growers—true Duchess quality with far greater market attractiveness.

McIntosh Red Stark Strain

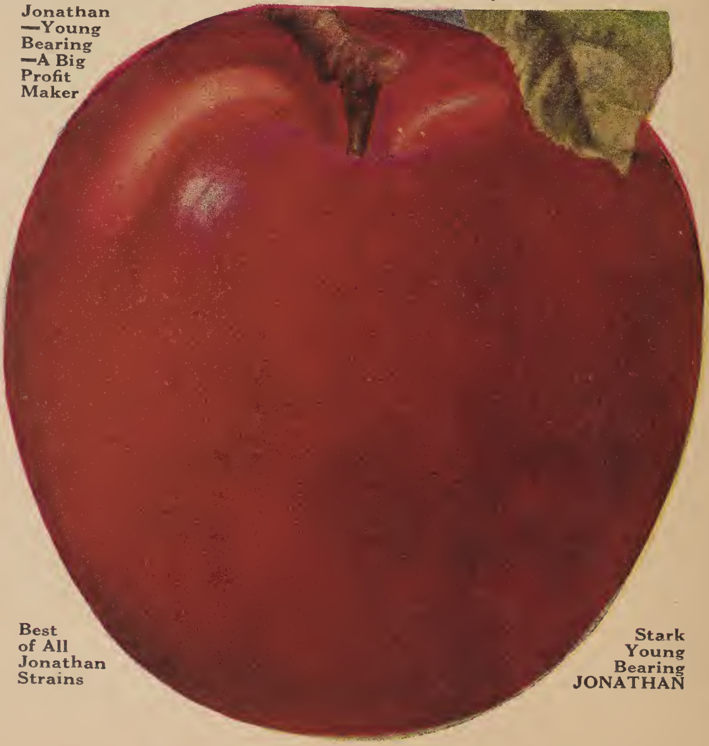
Winter Apple. All our trees propagated from Parent tree in Orchard of A. E. Jansen, New York McIntosh King. This tree has a Record-Bearing of 51 bushels. The extra vigor is apparent in all Stark grown McIntosh Red Trees. The fruit is big with attractive crimson skin, delicate crisp aromatic flesh that is almost snow white. A fine long-lived tree, very hardy, strong grower and young bearer. A big Profit Maker.

Jonathan Stark's Young-Bearing Record-Bearing Strain

Winter Apple. A remarkable tree is the Parent of all our Jonathan Young-Bearing Trees. We discovered this tree in Missouri where it matured 20 apples when **ONLY 3 YEARS OLD**—and bore 90 apples when 4 years old—**NEVER MISSED A CROP SINCE.**

Jonathan is a fine apple—good size, bright red and possessing a spicy rich acid flavor and crisp flesh that makes it a universal favorite. The tree is adapted to wide varieties of soils—succeeds all through Central West, East, South, Northwest and as far North as Michigan. Is rather spreading in growth, hardy, long-lived—**AND OUR JONATHAN STRAIN BEARS YOUNG.** One of the greatest and surest money-makers for orchardists everywhere.

Jonathan—Young Bearing—A Big Profit Maker



Best of All Jonathan Strains

Stark Young Bearing JONATHAN

Stark Delicious
Trade Mark
ORIGINAL TREE Strain
Trees Obtainable ONLY from Stark Bro's

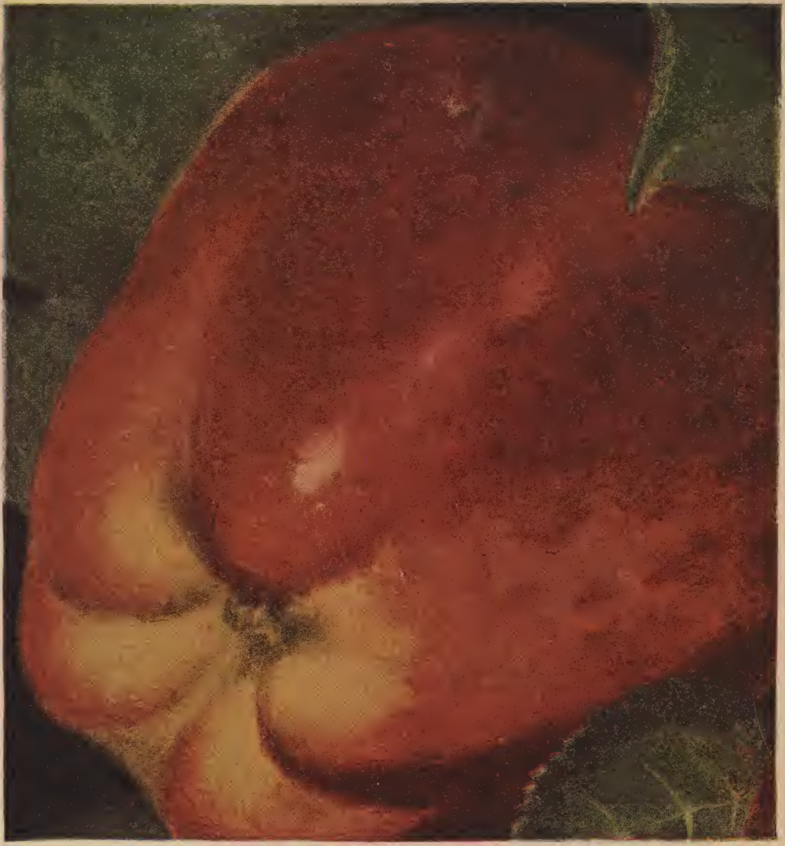
"The Dessert Apple Supreme!"

"THE Finest Red Apple In All The World"—said Luther Burbank, before we discovered Starking. This great, big, flashing, LATE WINTER red apple is the one so easily recognized because of its beautiful waxen skin of deep crimson blending off into golden yellow at the blossom end, with its five knob-like protuberances. Have you sunk your teeth with joyous relish into the tender crisp, juice-laden flesh of a Delicious apple? If so, you must be still smacking your lips over its deliciously DIFFERENT flavor. You must still remember its alluring aroma, with its faint suggestion of sparkling old wine. Admittedly, the Delicious IS "The Dessert Apple Supreme!"

The Genuine ORIGINAL TREE Strain Stark Delicious Trees are fast growing, hardy, extremely resistant to disease, great pollenizers and regular annual bearers.

And—shrewd orchardists and careful home orchardists have always INSISTED on Getting genuine ORIGINAL TREE Strain Stark Delicious BECAUSE they **know** that the Original Tree was discovered by C. M. Stark over a third of a century ago—that we immediately **purchased Exclusive and Perpetual Rights** to this tree and we were protected by a U. S. Registered Trade-Mark. We continuously renew our stock from this **Original Tree.**

Of course, NOW, we recommend the Improved, Double-Red Delicious—STARKING, instead of Delicious, for planting in Commercial Orchards. For home orchards, however, Delicious still has our heartiest recommendations.



Staymared *Late Winter*—Stark **DOUBLE-RED** Stayman Winesap (pronounced Stay-ma-red.) Discovered and bought by us in famous Moomaw Stayman Orchard in Virginia. True Stayman Winesap except **STAYMARED APPLES COLOR A DEEP WINE RED ALL OVER** when ordinary Stayman are red striped and partly green. Large flashing red apple— quality delightful, flesh juicy and crisp, with mild pleasant acidity and wonderful spicy flavor. Tree very vigorous and healthy **TREES SOLD ONLY BY STARK BRO'S.**

Staymared's Solid All-Over-Red Color Means 100 Per Cent Extra Fancy Grade in Color—assuring Higher Market Prices for these Improved Red Stayman Winesap apples.

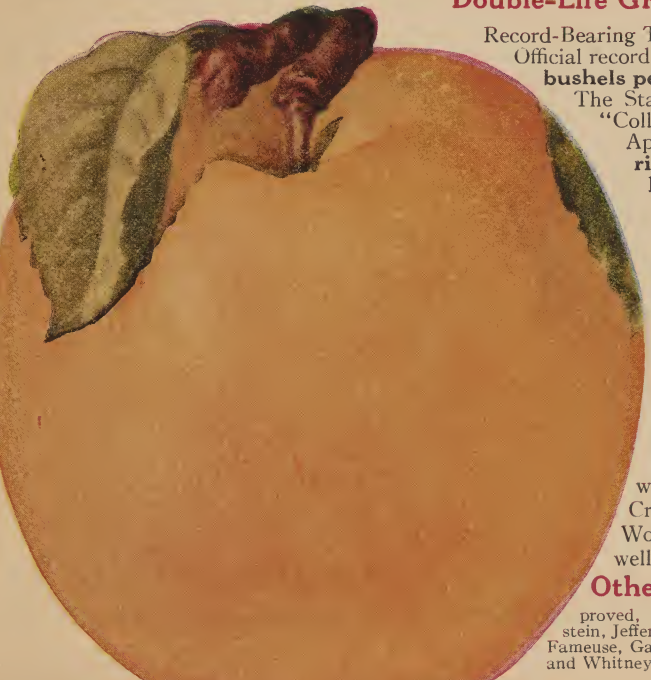
Stayman Winesap *Stark Heavy Bearing Strain.* Propagated from select Stayman tree in Shenandoah Valley, Va.—a tree noted for its high color, huge size fruit and splendid tree characteristics. Fruit is large, with delightful quality, crisp flesh, juicy with mild, pleasing acidity and spicy flavor. The **DOUBLE-RED** Stayman, **STAYMARED,** is, however, better for commercial plantings. Trees **SOLD ONLY** by Stark Bro's.

Black Ben *Winter.* Propagated from best known Record-Bearing Parent Tree. Fruit deep blood-red—no stripes—very attractive. Far better than Gano or any other Ben Davis type. Extremely heavy bearer. A moneymaker. Perfect keeper. Never scalds.

"Double-Red" Rome Beauty *Winter*—An improved **SOLID RED ALL-OVER** strain of old Rome Beauty. Propagated from specially selected Parent Tree in noted Cox Orchard, Lawrence, Co., Ohio. **Obtainable only from Stark Bro's.** The extra beautiful large apples color deep solid red clear to the stem and calyx. Far better than old Rome Beauty. Tree is young bearer, **LATE BLOOMER** (dodges frosts), bears regularly and heavily when others fail. By far the best strain of Rome Beauty.

Trade Mark "Double-Life" GRIMES GOLDEN—Record-Bearing Strain

A Double-Life GRIMES GOLDEN Apple.



Double-Life GRIMES GOLDEN— The best **Yellow Winter** Apple except Stark Golden Delicious. Propagated DIRECT from a Record-Bearing Tree—the most famous in the U. S. for vigor, fine fruit and heavy bearing. Official records of this tree at the Ohio Experiment Station shows that it **averaged 23.9 bushels per year for 14 years.**

The Stark (trade-marked) "Double Life" Method of Propagating eliminates the "Collar rot" fault of old Grimes Golden trees.

Apples are good size—golden transparent yellow in color—crisp, tender flesh, **rich flavor, spicy** and juice laden, with exquisite, fragrant aroma. Keep until **Mid-Winter.** Tree is hardy.

Stark King David *(Trade-Mark) Winter.* Colors earlier than Jonathan. Extremely young, **SURE,** heavy bearer. Fruit is improved Jonathan—redder—spicier quality. Hardy, blight resistant, fine long lived tree. Sold **ONLY** by Stark Bro's.

York Imperial *Late Winter.* Large, Commercial Export apple, pinkish red with faint stripings of darker red. Crisp, firm flesh—fair to good quality. Wonderfully heavy bearer. Keeps well. A splendid baking apple.

Winesap *Stark Virginia Strain.* We offer a Special Strain of great value. The original tree stands in a Winesap orchard in the Shenandoah Valley of Virginia that has regularly produced tremendous crops of extra size and extra color fruit.

Paragon *Gilbert Winesap.* Best, youngest bearer of Mammoth Black Twig type. Deep, solid red apple 50% larger than old Winesap. Firm, rich flavored. Late Winter Keeper. Long-lived, bears well. Staymared, however, is better.

Other Apples—CRABS We can supply, N. W. and R. I. Greening, Double-Red Baldwin, Imp. Rambo, Giant Geniton, Mam. Blk. Twig Improved, Red Northern Spy. Banana, Bellflower Imp., Cortland, Champion, Triple-Red Gravenstein, Jefferis Red, Double-Red Willow Twig, Maiden Blush, Senator, Sweet Bough, Liveland Raspberry, Fameuse, Gallia Beauty, Double-Red York and Early Harvest Apples—and in **CRABS,** Florence Gold and Whitney.

U. S. Patented Hal-Berta Giant—30% Larger Than J. H. Hale—Bears Heavy as Elberta

U. S. Patent
Granted

HAL-BERTA GIANT—World's First Patented Peach

Trade-Mark

Original Tree at 4 Yrs. Bore 6 Bu. of Peaches—Many Weighing a Pound Each!

Hal-Berta Giant—the amazing **NEW** Mid-Season Freestone Yellow Peach which fills the long-felt need for a **SUPREMELY HIGH QUALITY, EXTRA LARGE** yellow freestone peach to lengthen the Hale-Elberta season. A beautiful peach—almost fuzzless skin—small pit—firm, luscious, honey-sweet flesh and juice.

Hal-Berta Giant Trees Sold ONLY by Stark

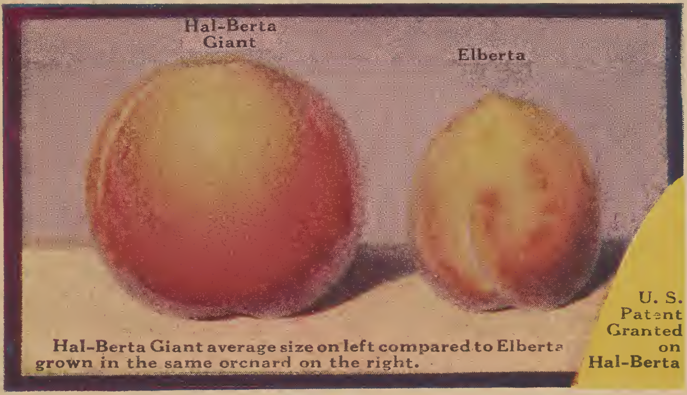
Our experts reported: "This peach is so marvelous that one must see this tree to get a real idea of how **beautiful** and **BIG** peaches can be. Not a single small peach on entire tree. These peaches have developed huge size with very little moisture. If moisture had been normal, they would have been **STILL BIGGER!"**

This wonderfully **BIG** peach has all the delicious flavor and melting tender flesh of J. H. Hale (though **ACTUALLY** 30 Per Cent **LARGER** than Hale)—bears bumper crops like Elberta.

Eye-witnesses of the behavior of the original Hal-Berta Giant Tree declare: **"This 4-year-old tree bore 6 bushels—and half of these peaches WEIGHED NEARLY A POUND EACH! The tree began bearing when 2 years old."**

This proved to be **the Yellow Peach for Which We Had Been Searching for 15 Years!—A Yellow Freestone Peach to Follow J. H. Hale and Elberta**—and lengthen the high-profit-season for growers.

Hal-Berta Giant Peach Trees (Sold **ONLY** By Stark) are remarkably **VIGOROUS** and **HARDY.** Young Hal-Berta Giant Trees came through **26 degrees below zero** two winters ago—in fine shape where many Elberta and Hale trees were winter killed.



Hal-Berta Giant average size on left compared to Elberta grown in the same orchard on the right.

This huge peach originated in the famous Markham Peach Orchard, in Clay Co., Ill. We sent experts to investigate this remarkable peach and the Original Hal-Berta Giant tree—and BOUGHT THE ORIGINAL HAL-BERTA GIANT TREE, PAYING THE HIGHEST PRICE EVER PAID FOR A PEACH TREE!

GOLDEN JUBILEE NEW-EARLIEST YELLOW FREE

The EARLIEST True Yellow Freestone. Ripens 25 days before Elberta, good size, delicious quality. Originated by New Jersey Experiment Station. A beautiful Very Early, big peach of Elberta type. Ships much better than most very early peaches. Tree Vigorous. Blooms later and is hardier than ordinary Elberta.

Originator of Hal-Berta Giant and ex-President Am. Pomological Society comparing a big Hal-Berta with Hale. This 6 bu. crop of huge Hal-Bertas came off original 4-year-old Hal-Berta tree in background.

Early
Elbertas

Ripens 2 Weeks Earlier than old Elberta

BEST of 4,000,000 New Peaches Tested in 30 Years

STARK Early Elberta was selected by us as the **BEST** of its season **ONLY** after nearly 30 years of tests of nearly 4,000,000 different new seedling varieties, mostly Hybrids of Elberta, which we sent out for testing.

The **ORIGINAL** Stark Early Elberta tree was developed from a Stark grown Seedling tested out in the orchard of Dr. Sumner Gleason of Kaysville, Utah. From this Original Tree and Genuine Stark Early Elberta Trees descended **DIRECTLY** from the Original Tree, we have propagated **ALL** our Stark Early Elberta trees. **No other nursery can propagate a Genuine Stark Early Elberta Peach from the Original Tree.**

Bore at 2 yrs. in Kansas

"My Stark Early Elberta trees bore their first crop at 2 years. The hardiest, most profitable—fruit **superior quality** to any other."—O. J. Taylor, Saline Co., Kans.

Shipped Safely 11,509 Miles

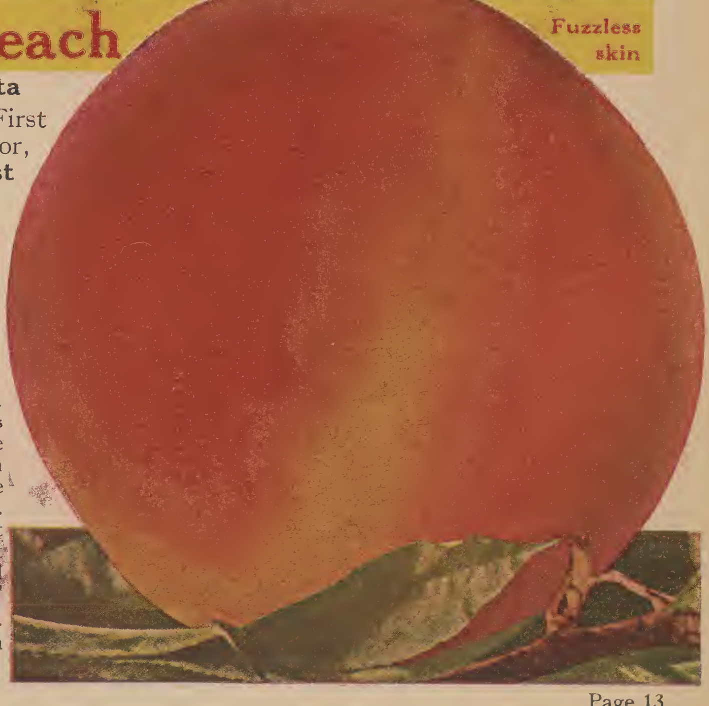
SIX boxes of Stark Early Elberta Peaches were shipped by Dr. Sumner Gleason from Utah to New York—reshipped to Prof. Wickson in Calif.—and then again shipped to Missouri **all in express cars** IN HOT WEATHER **without** AN OUNCE OF **ice.**

Then, to make the shipping test still more severe, they were AGAIN shipped to Editor Collingwood of Rural New Yorker, in New York, who in turn reshipped them to Louisiana, Mo., and they arrived in perfect condition. **A world's record shipping test!—11,509 miles without damage.**

The **Prince** of **All** Elberta-type peaches. Introduced by Stark Nurseries. Beautiful, golden fruit, blushed with vivid red. Has strong nearly fuzzless skin enveloping firm, but melting, rich golden flesh, and blessed with a simply **delightful** refreshing flavor. No peach can boast more gratifying delicious quality. No other **freestone** peaches are as good for canning. Not spongy and coarse as so many old Elbertas are.

Allures all with its beauty, delights with its exquisite quality and **sells for highest prices where the truly finest flavored fruit is sought and sold. Ripens 2 weeks earlier than old Elberta.**

J. H. HALE $1,000,000 Peach



Fuzzless skin

Mid-Season, Yellow Freestone—Superior to old Elberta

ORIGINATED by Mr. J. H. Hale, "The Peach King." First trees grown by us. Surpasses old Elberta in size, color, texture, flavor, keeping and shipping. **Ripens with or just after Elberta,** but **colors sooner.** Huge size, vivid carmine over golden yellow skin, almost perfectly round—**fuzzless.** Flesh solid, yet tender, melting, nearly free from grain and stringiness. **Exquisite flavor**—no bitter Elberta tang. Marvelous shipper. Stocky tree—often bears at 2 years. Heavy bearer. Succeeds almost everywhere.

$1420.00 Acre Profit

Southern Farming quotes—"From 1 acre J. H. Hale trees we harvested 748 bushels—1500 baskets and 1000 six-basket crates. They sold the next morning for **60 per cent higher than Elberta.**"

Stood 22° Below Zero

Elberta froze out at **22 degrees below zero; Hale came through** without injury. Very large fruit; very vigorous. Rapid grower here. —N. P. Mead, Chelan Co.

"Big as Cantaloupes"

—from Columbus, Ohio **CITIZEN.**

"Peaches as big as cantaloupes—These (J. H. Hale) peaches were grown by J. C. Taylor on the north side of a big hill in Ross Co. Some are almost 5 inches in diameter. Experts expressed the opinion that these Hale peaches were the finest in the world. Mr. Taylor disposed of his fruit at 25 cents per peach."

Note:—All Mr. Taylor's J. H. Hale Trees were purchased from Stark Nurseries.

6 Best Golden-Fleshed Peaches—From Early to Late For Market and Home Use

YELLOW FLESH PEACHES—Prices Pages 26-27

June Elberta *Earliest-of-all Yellow Peaches.*—For years peach growers have been asking for a large YELLOW FLESHED PEACH THAT RIPENS EXTREMELY EARLY. We have searched America for a peach of this class, have tested many, but not until we fruited JUNE ELBERTA, did we find one that we could wholeheartedly recommend. Ripens about with Red Bird Cling. These two peaches make a great money-making combination. Both ripen about **40 to 45 days before Elberta**—and a man who has an orchard of them can put on the market the BEST EARLY WHITE-FLESHED AND THE BEST EARLY YELLOW-FLESHED PEACH GROWN.

A semi-freestone; big handsome peach, high color, delicious quality, ships well. Trees are vigorous, young and heavy bearers and blossoms very hardy—**brings highest prices.**

"My June Elberta sold for $3.50 per bushel here while inferior kinds brought about half this price."—J. S. Smith, Cabell County, W. Virginia.

"On the grounds of Geneva, N. Y. Exp. Sta., June Elberta is wonderfully attractive. Fruit large, handsome yellow, red blush on sunny side—one of **handsomest of peaches**. Quality good and equal to or an improvement on Elberta."—Prof. U. P. Hedrick (N. Y. Exp. Station).

"June Elberta about a month earlier than Elberta. Fruit large and attractive."—Stanley Johnson, Supt. South Haven, Mich., Exp. Sta.

Stark Early Elberta *Early Yellow Freestone.* Introduced by Stark Bro's. Easily finest of all Elberta types. Turn to Page 13 for full description and record.

Golden Elberta Cling *Mid-season Yellow.* Greatest, most delicious, yellow-fleshed clingstone peach ever introduced. **"Finest Canning Peach In The World."**

J. H. Hale *Mid-season Yellow Freestone.* The wonderful yellow freestone that ripens 3 or 4 days ahead of Elberta. Turn to Page 13 for full description and record of J. H. Hale.

Late Elberta *Late Yellow Freestone.* (Stark Rex Strain) Elberta type ripening about **21 to 28 days later** than old Elberta. Better quality than Elberta, somewhat larger. Fills gap between Hal-Berta and Krummel October. Highly flavored, sweet, no bitterness at pit. Ships perfectly, does not rot, good appearance on markets. Many growers report it one of their surest late market profit-makers. By planting this with Hal-Berta the ripening season can be lengthened four weeks.

Krummel October *Latest Yellow Freestone.* Greatest of all late yellow peaches. The peach that ripens after all other good peaches are gone—reaches market at the time when it has no competition. Always *brings highest prices.*

Large—almost as round as J. H. Hale, deep yellow with blush of carmine. No peach is sweeter or better—no bitterness next to pit. Flesh firm, fine texture—ships perfectly. Canning quality the best. (Introduced by Stark Bro's.) Ripens about **40 days after Elberta.**

"Krummel October is perhaps the best late yellow freestone. Thrives in all localities where peaches are grown—a little later than Salway and a better peach. Tree hardy, dependable cropper. Krummel should be in every family orchard."—Missouri State Exp. Sta. "The best paying peach I know."—N. Waterhout, St. Louis Co., Mo.

Stark's "Silver Medal" Peach Collection No. 8

6 Best White-Fleshed Peaches—From Early to Late
For Market and Home Use

WHITE FLESH PEACHES—Pages 26-27

Red Bird Cling *Earliest Red-White Cling* **"The Greatest Money-Maker, Earliest, the Largest and Best of all commercial peaches ripening before Stark Early Elberta".** Size immense, averaging almost large as J. H. Hale—perfectly round, **"Red as fire"**, ships better than Elberta—and from the time we introduced it, has **topped all early markets.** Brings double price of Elberta and other standard varieties.

If you want a very early peach, there is really ONLY ONE, for Red Bird Cling stands alone as the best. Ready to ship when the markets are bare of good peaches—bringing as high as **$4 to $6 per bushel.** Ripens **45 days ahead of Elberta.**

"57 Red Bird Peach trees netted me $669, covering about ½ acre of land."—J. E. Eggers, St. Louis Co., Mo.

Eureka *Early White Semi-Free.* We introduced Eureka because of its **iron-clad hardiness,** size, beauty and ripening season—about 10 days after Red Bird Cling, **30 to 35 days ahead of Elberta.** Bears when other so-called hardy sorts are killed. Beautiful rosy cheeked peach, white flesh, delightful flavor. Semi-freestone. We recommend it where a succession of ripening is desired.

Alton *Early White Semi-Free.* After 25 years' experience we recommend this as ideal peach of Champion-Belle of Georgia-Hiley type. Not all years a true freestone—some seasons being semi-freestone. Ripens **25 to 30 days ahead of Elberta**—about 15 days after Red Bird Cling. Tree and blossoms among the hardiest, one of the surest bearers known. Fruit large, flesh white, sweet, delicious.

Stark Summer Heath *Mid-season White Cling.* Creamy-white fleshed peach of the Heath type. Ripens mid-season. Flesh snow white clear to pit, fruit medium large, very handsome appearance. Has lusciousness of late season Heaths. **A wonderful peach for canning,** requires little sugar. Tree hardy, good bearer, and ripens about **7 days after Elberta.**

Illinois (Trade-Mark). *Mid-season White Free.* Handsome, **fiery-red** cheeked peach, pure white flesh, perfect freestone. Juicy, spicy, high flavored. Compares with Champion in quality. Holds up remarkably well in shipping. Ripens **just before Elberta.** Comes in when a good quality Red Cheeked white fleshed peach is wanted. Red Bird Cling, Alton and Illinois are the three ranking white-flesh peaches of their seasons, and are recommended for all sections.

Stark Heath Cling *Late White Cling.* An Extra Large, selected, tested, Record-Bearing strain of White Heath, **40 days after Elberta.** Best Heath Cling type. Mich. Exper. Station states: "100% more productive than old Heath." Most delicious quality, flesh tender, melting, juicy, flavor incomparably luscious.

JULY ELBERTA Peach

Burbank's Very Early New Yellow Freestone

July Elberta Was GRANTED A U. S. PATENT—In this wonderful fruit, Burbank created the **Long Looked-For VERY Early Yellow TRUE FREESTONE Peach**—ripening about twenty-four days before Elberta—and between June Elberta and Stark Early Elberta.

The fruit is beautiful, big, vivid all-over-red peach that makes its trees appear aflame with fire—most brilliant red of all peaches except perhaps Red Bird Cling. Flesh is pure **golden yellow,** rich in flavor, tender and juicy in texture. Far better quality than old Elberta. Superb for eating fresh or canning.

Burbank's July Elberta trees have demonstrated in our years of tests that they are **the most prolific bearers in our Burbank-Stark Test Orchards**—always bearing heavy crops of very uniform, extra large peaches **ripening just at the time that really fine peaches bring** highest market prices. The crop is well distributed over the tree—a characteristic which is very desirable in a peach for either the commercial or home orchard.

VERY HARDY—bore splendid crops even after 14 degrees below zero in Northern Missouri.

Black Giant Cherry

Sweet. Luther Burbank described Black Giant as "Firm, deep blackish crimson skin. Sugary sweet and delicious. Gigantic in size—**4 cherries weigh an ounce!"**

Our years of tests have proven it an **enormous bearer,** but fruit is uniformly huge despite tremendous crops! Flesh mouth-watering blood red, almost purple around small pit—very firm and meaty—marvelous shipper. Shipped clear across U. S., **reached destination without a bad cherry in the box.**

Amazingly **HARDY** tree—bore after 14 degrees below zero in our Test Orchards in Northern Missouri. The **HUGE** size, wonderful beauty and enticing flavor of "Black Giant" Sugar Cherry makes it **first** favorite in Home Orchards. Its striking appearance, supreme quality, **record-breaking shipping ability** and its great crops of gigantic cherries are the reasons why far-sighted commercial growers are planting Black Giant for the high class, high price markets.

Late Honey-Heart Cherry

U. S. PATENTED—"Beautiful, like Napoleon cherry—but infinitely better," declared Luther Burbank. Our years of tests prove it **the youngest, heaviest producing, big, sweet cherry Luther Burbank ever created.**

Skin is Red and Gold, becoming deep, rich, glowing red when fully ripe. Huge, heart shaped cherry—crisp, juice-laden, marvelously delicious flesh of transparent white (resembling color of White Clover honey). **Perfect freestone.** Wonderful shipper—arrived in splendid condition after 2,000 miles in hot weather. Almost completely immune from brown rot and cracking. Tree strong grower, hardy, young bearer. Ripens here in Mo. about **June 20.**

GIANT Freestone Peach

A marvelous peach for your home orchard. Tremendous size—**many 4 inches in diameter**—a **BIG** Golden Peach with a thick, luscious, pure golden flesh brimming over with sugar-sweet juice, free from the slightest sharp acidity. A genuine TREAT to eat out of hand and simply glorious when served sliced and smothered with cream. HARDY—bore after very severe winter.

Peacharine

Combination of yellow Peach and white Nectarine—by Burbank. Big, blush-less, cameo-yellow freestone fruit—nearly **fuzzless.** Flesh firm, saturated with sugary juice. Tree vigorous—bore heavily in Missouri 2nd year. Ripens late August here.

Early Honey-Heart Cherry

Beautiful Red and Gold Sweet. Except for early ripening, very like Late Honey Heart. Fine for home markets. Tree very young, heavy bearer.

Rainbow Stripe Cherry

A remarkable novelty in cherries—originated on a dark red Lambert Cherry Tree with one limb bearing WHITE Lambert Cherries with a narrow **Blood Red Stripe** from stem to tip—a true bud-sport. Fruit huge, delightful flavor, ripens mid-season. Tree hardy, bears abundant crops uniformly large cherries shaped exactly like Lambert. Fine cherry for your home or commercial orchard. Great shipping cherry. Remy Strain.

JULY GOLD Peach

The triumph of Burbank's ambition to create a yellow Freestone peach that would **ripen very early in summer. Ripens two weeks ahead of regular Elberta.** A **BIG** clear yellow-orange peach—2½ to 3 in. across. Rich golden flesh blessed with entrancing flavor. Very young, heavy bearer—**HARDY** vigorous grower. Wonderful early peach for home.

Blood Flesh Nectarine

ONLY INDIAN BLOOD NECTARINE EVER DEVELOPED! Rich color of Indian Blood Peach—skin plum-smooth—blood red tender flesh marbled red and white near pit—wine-like flavor.

"Flaming Gold" Nectarine

The famous "Lost Nectarine" of Luther Burbank. The Wizard has here created a perfect blending of White Nectarine and a delicious yellow peach. Burbank declared: "The very best of my Nectarines." Big as a Champion peach. **Waxy, Fuzz-free skin** of flaming wine-red, blushed over vivid gold. Rich golden orange flesh of Honey sweetness and Champagne sprightliness. Stone is perfectly free and small. Flesh firm. Splendid shipper—**Does not crack.** A luxury fruit for the home—one that assures great profits to commercial orchardists. Ripens about **1 week before Elberta** peaches. **Almost unbelievable young bearing ability: Young 1-yr. trees in our nursery, after the hardest, longest winter in 20 years** (often 14 degrees below zero) **came through loaded with blossoms and set a tremendous crop.** Will bear young, immense crops in Eastern and Mid-Western sections. Very resistant to disease, rot, etc.

ELEPHANT HEART, Illustrated below—Largest Known Plum—one that you can break and eat like a Peach

-U. S. Patented—Sold ONLY by STARK

Elephant Heart—Luther Burbank's Greatest PLUM Masterpiece

Imagine a plum 2½ x 2¼ in.—big as a U. S. Standard apple—a huge, heart-shaped beauty! A **perfect freestone plum** that you can break and eat like a peach! Blood-red flesh as exquisitely luscious as an Oxheart Cherry. **The most marvelous freestone blood-fleshed plum that the world has ever known.** The greatest triumph of all Burbank's painstaking life work. The supreme **BEST** of over 800 new varieties that Burbank bequeathed to Stark Bro's.

ASTONISHINGLY HARDY! In Mo. and Ill., where 15, 20 and even 25 degrees below zero often occur, Elephant Heart Trees have proven their rugged hardiness, made vigorous growth and **borne very young and heavily**—and, despite heavy bearing, the fruit is uniformly huge and attractive heart-shape all over the tree.

Fruit is remarkable shipper. Strong, firm skin—does not crack. Solid flesh. Can be picked 2 weeks before ripe and shipped successfully to far-distant points. **Has kept perfectly in warm room 42 days after picking and shipping 2,647 miles without refrigeration.**

BEARS YOUNG! Bore at 2 years in orchard of J. H. Bolton, Schuyler Co. **N. Y.** We cannot recommend Elephant Heart too highly for home orchards.

Flaming Delicious

U. S. Patented

BLOOD FLESHED. The great Early Ripening Team Mate of Elephant Heart. **Ripens 2 weeks before Elephant Heart.**

Very rugged and **HARDY**—came through 24½ below zero without injury. Fruit is of great size—often 2½ x 2¼ in.—color waxy, shining red and **FLESH IS GLORIOUS BLOOD-RED CLEAR TO PIT.** Flavor is sweet, rich, juicy. A Perfect **FREESTONE**—so firm that it ships perfectly—small seed. A plum that you will be proud to raise in your home orchard, for, of it, Mr. Stark said, on first beholding it in all its glory, "This **ONE** huge, early plum is alone worth more to fruit lovers than all the years and money spent on the Burbank Experimental Gardens! The tree is a late bloomer—and will escape frosts that kill many other varieties.

Mammoth Cardinal

U. S. PATENTED. *Early*—Huge, cherry red-skin, gold-flesh plum. Some measure 2¾ in. across. Very thick, rich, semi-transparent, creamy yellow flesh—firm, fine grained, solid. Sweet, delicate flavor—completely free from sharp acidity.

Honey-Moon Plum

Mid-Season Yellow—A luscious Green Gage hybrid Burbank produced. A GREAT GLORIOUS GOLDEN YELLOW PLUM with the sweet, tempting quality of the Gage. Fruit large, almost transparent golden yellow. In it Burbank combined the delicious flavor of the Gage with heavy bearing of Japanese Hybrids. Tree strong grower, produces **tremendous crops** annually. Hardy.

Stark APRICOTS

WILSON DELICIOUS—New, Tree hardy—Stood 26° below zero uninjured in Missouri. Very large, orange-yellow—firm, juicy, rich, aromatic flavor. Fine keeper. Hangs well. Stockham Bro's, Colorado state: **"5 to 10 days earlier than any other Apricot.** Sold for far more than any other variety."

STELLA—"The Apricot that is hardier than a peach." Originated in Nebraska. The fruit is large, beautifully colored, delicious quality.

SUPERB—Large hardy apricot of Kansas origin—well known and well liked.

Red Ace Plum

Delicious Crimson Flesh.— **Mid-Season Freestone** Plum, nearly as large as Elephant Heart, but rounder. Many 2¼ in. across despite extra heavy bearing. Of Red Ace, Luther Burbank wrote: **"BIG,** crimson flesh—firm—small seed—**sweet as sugar**—rich and full of delicious juice—annual and heavy bearer."

Tree **NEVER** winter killed in our years of exacting tests—even after 24½ degrees below zero. A **WONDERFUL SHIPPER**—and home orchardists will like it because it hangs tightly to tree with no sign of rot for 3 weeks after ripening. Young 3-yr.-old trees in North Mo. loaded with huge plums.

Purple Flame

Brilliant Purple Leaf Foliage Tree bearing rich red plums. Holds its beautiful purple leaves until late Fall. Very ornamental and fruitful.

June Red Skin

U. S. Patent

Earliest Red Skinned Yellow Fleshed Plum. Immense, extremely beautiful, perfectly round red-skinned **FREESTONE** plum with firm golden yellow flesh. Ripens a few days after **JUNE BLOOD** (Red Flesh) and **GREAT YELLOW.** Delightful flavor—sweet and juicy. Tree is very heavy bearer and remarkably **HARDY**—having withstood 24 degrees below zero here in Northern Missouri. A superb early plum for the home orchard—and a money maker on markets.

June Blood Plum

The **Earliest Big Blood Plum** among all of Burbank's marvelous Fruit Creations. Of it, Burbank wrote: "A rich, delicious, deep purple plum. Sweet, juicy, rich. **Largest of all plums ripening at this season."** Flesh amber, rosy-crimson (sometimes beautifully variegated). **Semi-Cling.** Small seed. Great and regular bearer. Has made wonderful record for heavy bearing and **Hardiness** in our far-famed Burbank Test Orchards. Excellent for home orchards for high priced fruit for roadside markets.

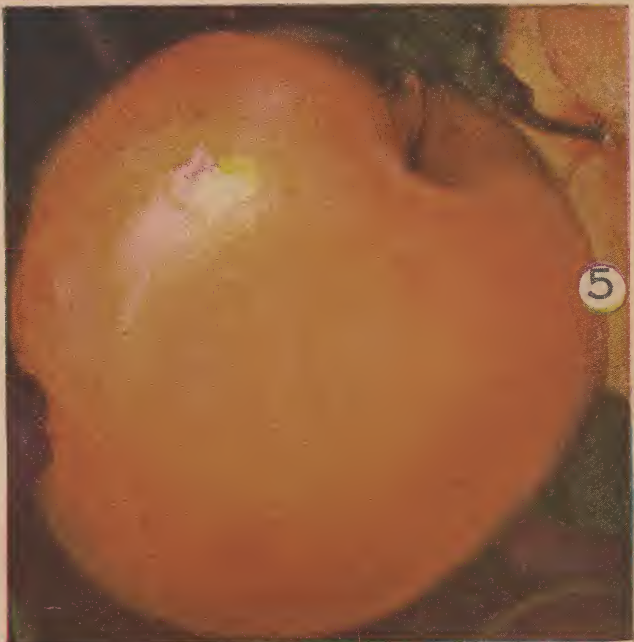
Purple Plumcot

Half Plum and Half Apricot. *Early*—Burbank was first man in world to combine the flavor delights of **BOTH** Plum and Apricot in one **NEW** fruit—the Plumcot. This **PURPLE PLUMCOT** is his finest Blood-Fleshed variety—huge, often 2 in. across. Gorgeous purplish red, with flesh blood red clear to pit. Very rich—irresistibly **DELICIOUS.** Perfect **freestone.** Is bearing splendidly in orchards east as well as west of the Rocky Mountains.

Great Yellow

U. S. Patent to Stark Bro's

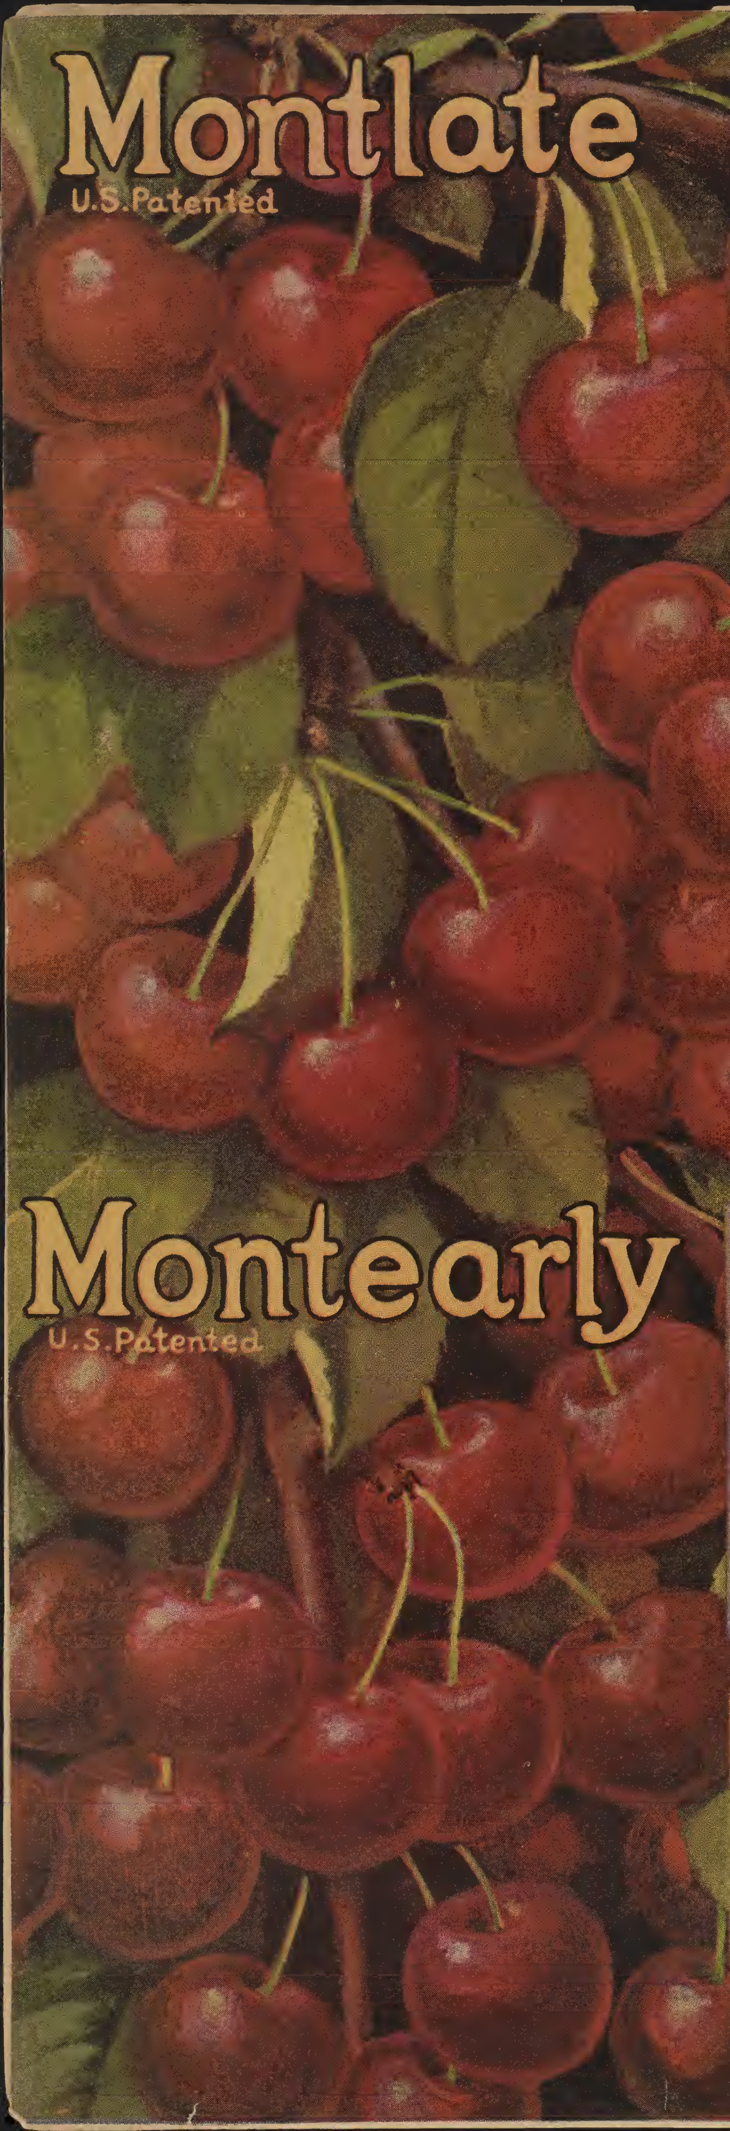
Earliest Yellow Freestone—Ripens even earlier than Shiro and much larger. Fruit is very large (2 to 2½ in. across), of pure golden yellow color (no red cheek) overspread with beautiful white bloom that makes it look almost like Alabaster. Our Test Orchard Superintendent declares it "the largest solid golden plum of all Burbank's—**Large as an apple."** Tastes exquisitely mild and sweet, with just the right flavor. Tree is a fine grower, good foliage, graceful up-right shape. Bore after 14 degrees below zero here in Missouri. Great shipping plum. Plum Experts who have carefully tested and studied all leading varieties, declare: **"Great Yellow and Honey Moon are unquestionably the two Greatest Yellow Plums in existence!"** Plant Great Yellow in your home orchard to have a great fruit delight for your family—and a high priced fruit for local markets.



Great Yellow—Earliest, Largest Yellow Freestone Plum

Montlate

U.S. Patented



MONTLATE — Nearly 2 Weeks LATER than Montmorency.
(U. S. Patented)

New
MONTLATE
Still Green
MONTMORENCY
Full Ripe

(*Left*) **MONTLATE** still green, (*Right*) **Montmorency** full ripe--both picked same day. **MONTLATE**, is a wonderful new profit cherry. Lengthens picking season, ripe when cherries are scarce, prices highest--ripens **nearly 2 weeks LATER** than Montmorency. **U.S.Patented, Sold ONLY by Stark Bro's.**

Montlate Cherry—Latest of ALL Montmorencies

U. S. Patented by Stark Bro's. Latest of ALL Montmorencies. A very large beautiful, rich red cherry that **Ripens 2 Weeks After Montmorency.** Bears heavy and as young as Montmorency—yields more fruit than English Morello, and cherries sell for same high prices as finest Morellos. **Tree very vigorous and does not show injury from leaf spot.** Has withstood 28 below zero without injury.

Montlate is the "long looked for late cherry"—discovered in orchards of Prof. L. R. Taft of Michigan. This new cherry ripens when other cherries are all gone and prices are highest. Prof. U. P. Hedrick, noted author of "Cherries of New York," declares:—**"Will Be A Great Boon to Growers and Canners."**

Montearly

U.S. Patented

MONTEARLY Nearly 2 Weeks EARLIER than Montmorency.
(U. S. Patented)

MONTMORENCY
Still Green
Earliest Cherry
MONTEARLY
Full Ripe

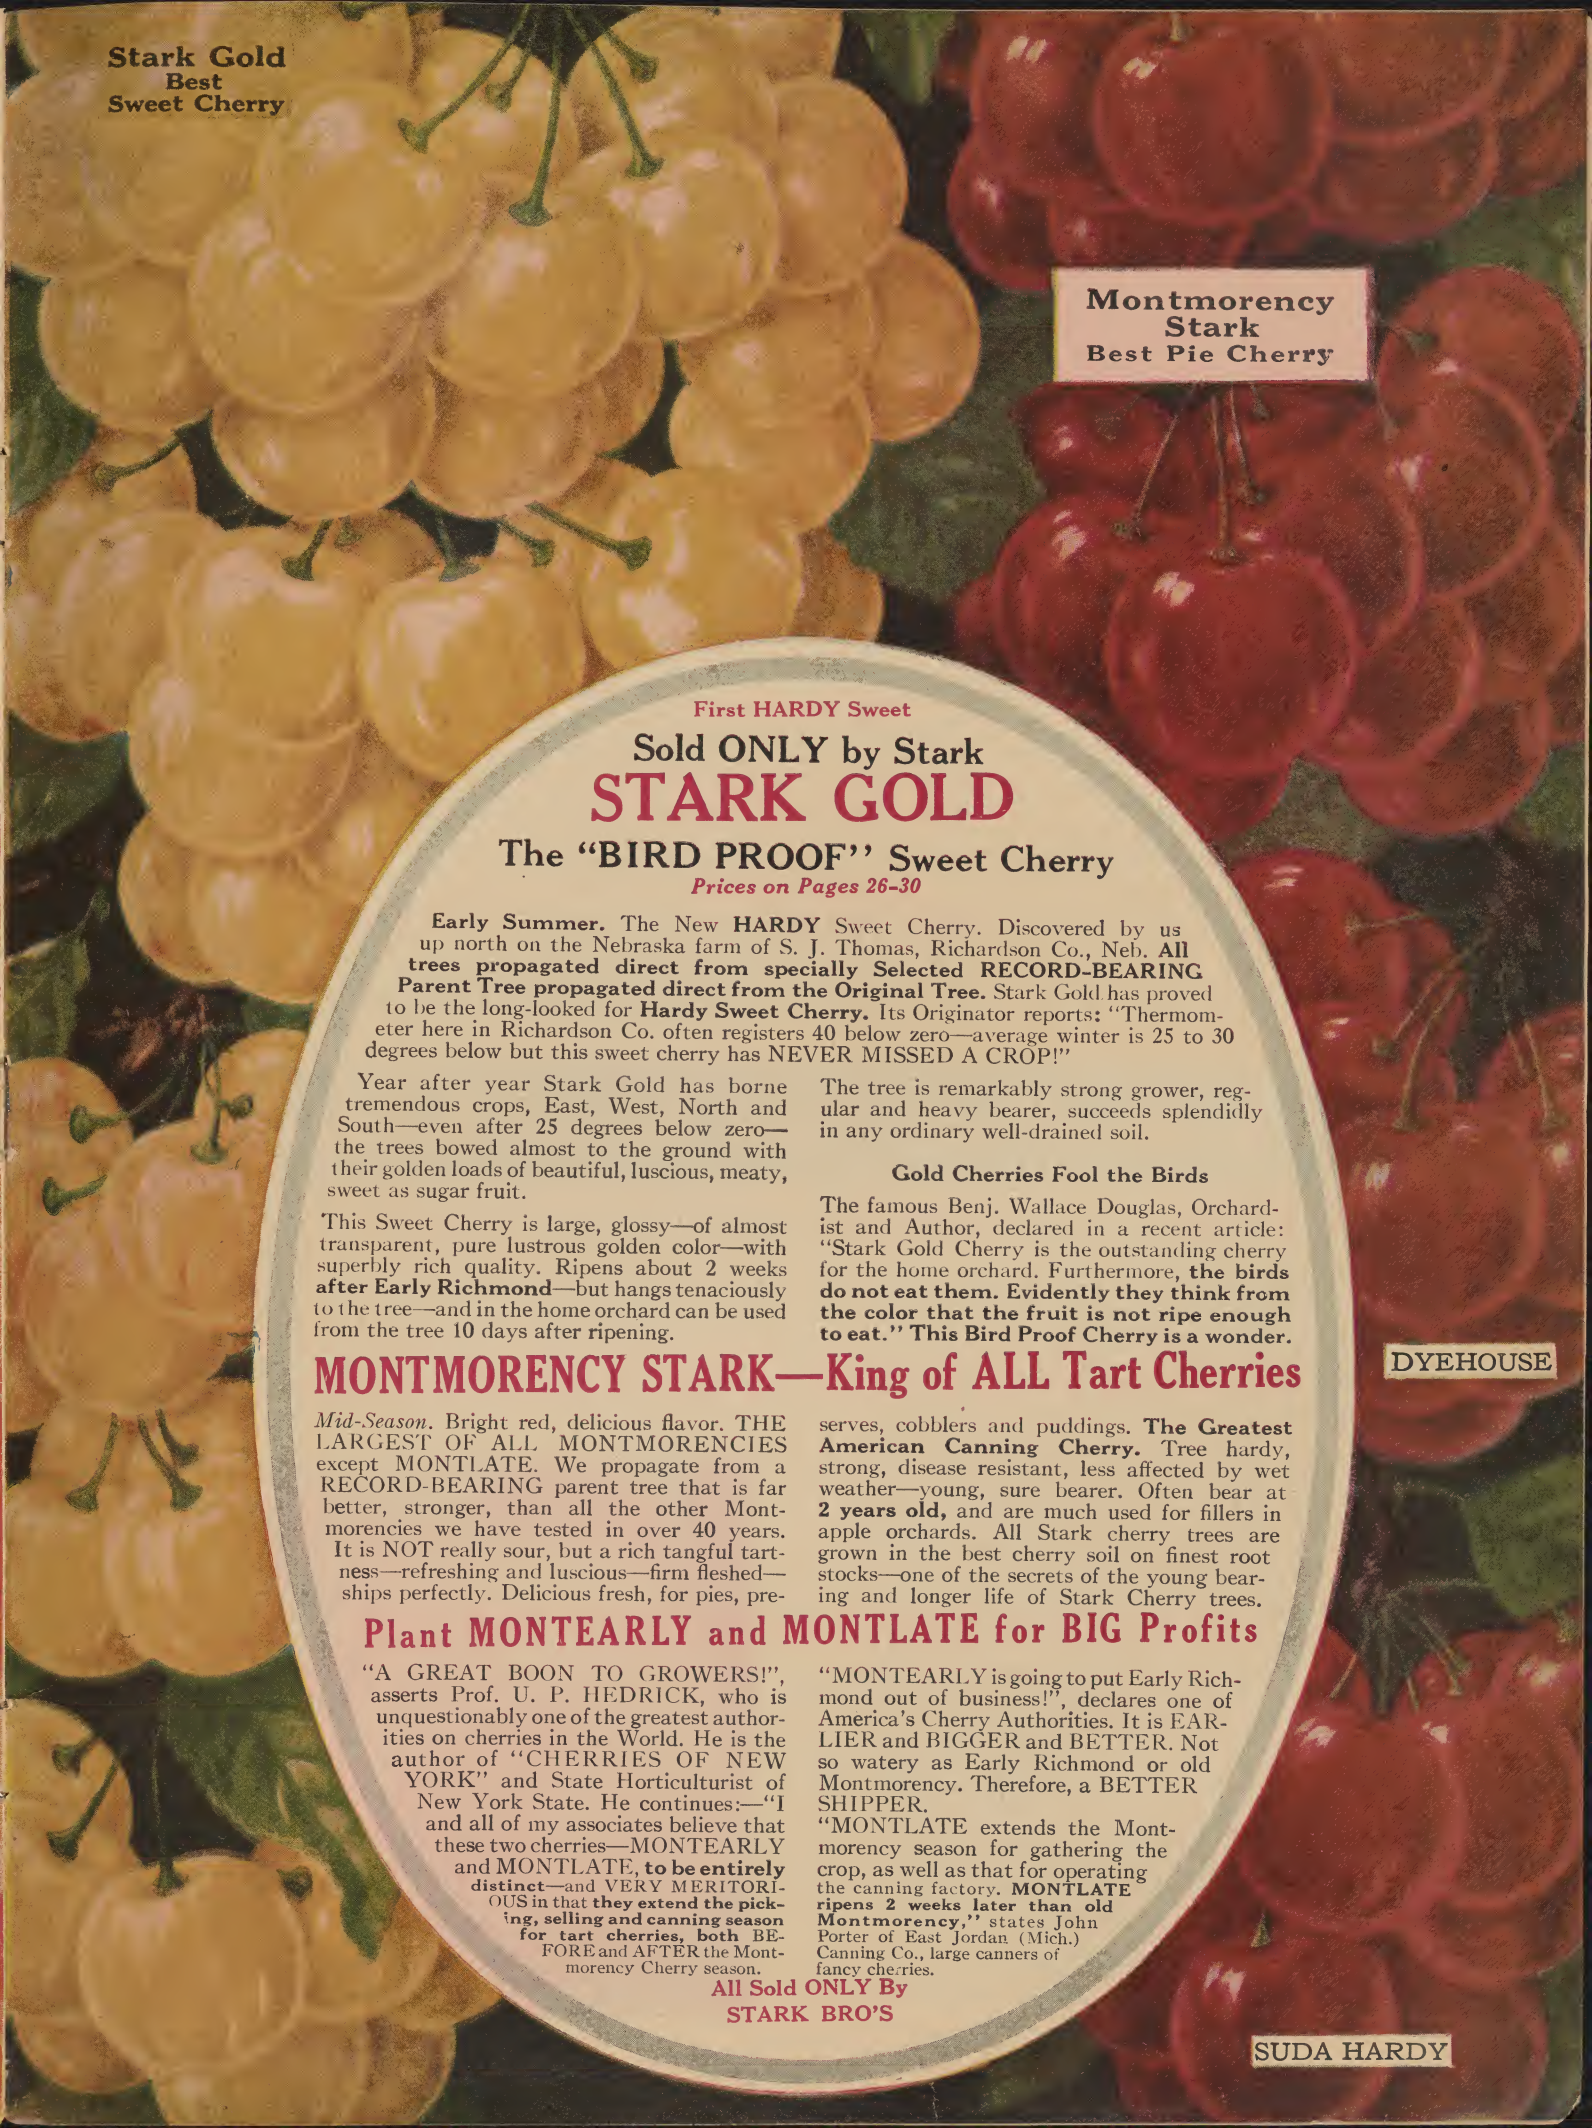
(*Left*) Montmorency still green, (*Right*) **MONTEARLY** full ripe—both picked same day. **MONTEARLY—Earliest Pie Cherry Known**—large, dark red, high quality. Ripens **nearly 2 weeks EARLIER** than Montmorency—bring top prices. **NEW — U. S. Patented, Sold ONLY by Stark Bro's.**

Montearly Cherry—Earliest Tart Cherry

U. S. Patented by Stark Bro's. Earliest Tart Cherry. Ripens 2 Weeks Before Montmorency—even earlier than Early Richmond and ½ larger than Richmond.

A superb deep wine—red cherry, with meaty flesh and delicious bright-red juice. Originated by the great Prof. L. R. Taft in his famous Michigan orchards. Size, shape and growth of tree same as Montmorency but leaves less subject to leaf spot.

The remarkable **SIZE** and **BEAUTY** of Montearly will make it a **PHENOMENAL MONEY-MAKER ON THE VERY EARLY MARKETS.** Jno. T. Bregger, Ext. Hort. Cornell Univ., N. Y. reports: "Montearly will double the incomes of Montmorency cherry growers!"



Stark Gold Best Sweet Cherry

DYEHOUSE
SUDA HARDY

First HARDY Sweet

Sold ONLY by Stark

STARK GOLD

The "BIRD PROOF" Sweet Cherry

Prices on Pages 26-30

Early Summer. The New **HARDY** Sweet Cherry. Discovered by us up north on the Nebraska farm of S. J. Thomas, Richardson Co., Neb. **All trees propagated direct from specially Selected RECORD-BEARING Parent Tree propagated direct from the Original Tree.** Stark Gold has proved to be the long-looked for **Hardy Sweet Cherry.** Its Originator reports: "Thermometer here in Richardson Co. often registers 40 below zero—average winter is 25 to 30 degrees below but this sweet cherry has NEVER MISSED A CROP!"

Year after year Stark Gold has borne tremendous crops, East, West, North and South—even after 25 degrees below zero—the trees bowed almost to the ground with their golden loads of beautiful, luscious, meaty, sweet as sugar fruit.

This Sweet Cherry is large, glossy—of almost transparent, pure lustrous golden color—with superbly rich quality. Ripens about 2 weeks **after Early Richmond**—but hangs tenaciously to the tree—and in the home orchard can be used from the tree 10 days after ripening.

The tree is remarkably strong grower, regular and heavy bearer, succeeds splendidly in any ordinary well-drained soil.

Gold Cherries Fool the Birds

The famous Benj. Wallace Douglas, Orchardist and Author, declared in a recent article: "Stark Gold Cherry is the outstanding cherry for the home orchard. Furthermore, **the birds do not eat them. Evidently they think from the color that the fruit is not ripe enough to eat." This Bird Proof Cherry is a wonder.**

MONTMORENCY STARK—King of ALL Tart Cherries

Mid-Season. Bright red, delicious flavor. THE LARGEST OF ALL MONTMORENCIES except MONTLATE. We propagate from a RECORD-BEARING parent tree that is far better, stronger, than all the other Montmorencies we have tested in over 40 years. It is NOT really sour, but a rich tangful tartness—refreshing and luscious—firm fleshed—ships perfectly. Delicious fresh, for pies, preserves, cobblers and puddings. **The Greatest American Canning Cherry.** Tree hardy, strong, disease resistant, less affected by wet weather—young, sure bearer. Often bear at **2 years old,** and are much used for fillers in apple orchards. All Stark cherry trees are grown in the best cherry soil on finest root stocks—one of the secrets of the young bearing and longer life of Stark Cherry trees.

Plant MONTEARLY and MONTLATE for BIG Profits

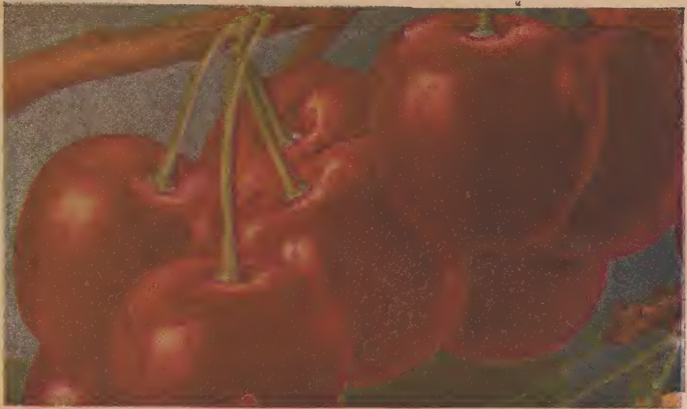
"A GREAT BOON TO GROWERS!", asserts Prof. U. P. HEDRICK, who is unquestionably one of the greatest authorities on cherries in the World. He is the author of "CHERRIES OF NEW YORK" and State Horticulturist of New York State. He continues:—"I and all of my associates believe that these two cherries—MONTEARLY and MONTLATE, **to be entirely distinct**—and VERY MERITORIOUS in that **they extend the picking, selling and canning season for tart cherries, both** BEFORE and AFTER the Montmorency Cherry season.

"MONTEARLY is going to put Early Richmond out of business!", declares one of America's Cherry Authorities. It is EARLIER and BIGGER and BETTER. Not so watery as Early Richmond or old Montmorency. Therefore, a BETTER SHIPPER.

"MONTLATE extends the Montmorency season for gathering the crop, as well as that for operating the canning factory. **MONTLATE ripens 2 weeks later than old Montmorency,"** states John Porter of East Jordan (Mich.) Canning Co., large canners of fancy cherries.

**All Sold ONLY By
STARK BRO'S**

Actual Color and Size Stark IMPROVED LAMBERT Cherries



See Page 16 for NEW Burbank Cherries

Stark Improved Cherries

Stark Lambert

Sweet. Dark Red. A huge early summer cherry of Ox-heart type. Extremely dark-red, solid-flesh, and of delightful quality—the great dark red cherry of the high-class fruit stand—AND OURS IS A SPECIAL HARDY STRAIN. We propagate Stark Lambert from a selected Record-Bearing tree in a Missouri test orchard where it has not missed a crop for years—and where by comparison with many other strains it shows unquestioned superiority in size, hardiness and regular heavy bearing. Leads in size of fruit, gallons per tree—producing heavy crop after **24 degrees below zero.** These cherries are dark purplish red—almost jet black when full ripe; ships well and is of supreme quality.

Montmorency King

(Ordinaire.) *Mid-Season.* A Special Strain that cannot be too highly recommended for quality and quantity of fruit, **hardiness** and beauty of tree, and unfailing crops. Ripens a week after Early Richmond. Montmorency is the most widely planted of all tart cherries, but there is not one-half enough grown to supply the demand. The trees do not require much care, and produce immense crops. Montmorency Stark and Montmorency King are ideal for the market orchard, the home orchard and the small yard.

Montmorency Sweet

Mid-Season. A true Montmorency—not a sweet cherry—but less acid than any other Montmorency. Originated on our own grounds.

Montmorency Monarch

Mid-Season. From the Iowa Experiment Station—and because of its extra heavy bearing qualities we have continued to grow it and recommend it.

Dyehouse

"Earliest of All except Montearly"—a week earlier than Richmond—larger, smaller seed. Montearly, Dyehouse, Montmorency Stark, Montlate and Suda Hardy, give excellent ripe cherries a whole month—they are the choicest of all tart cherries.

Early Richmond

(Very Early.) Ripe about a week later than Dyehouse and a week earlier than Montmorency. We prefer Dyehouse.

Royal Duke

(Hybrid—½ Sweet.) The best of the Dukes. Ripe early—more sweet than Montmorency—but not a true sweet variety. More Dukes should be planted in the home orchard.

Suda Hardy

(Late.) Wherever a late red tart cherry is wanted, Suda Hardy should always be planted. **Extremely hardy** and the fruit is produced in immense quantities. Ripe 10 days later than the Montmorencies—just when cherries are scarce. Introduced and sold only by Stark Bro's. The best of the English Morello group of cherries.

Black Tartarian Improved

Sweet. Dark Red. The hardiest, most dependable, most widely planted of all black sweet cherries. Ours are far and away the best strain of the well-known Black Tartarian—the famous Deacon-Mesel Strains. These strains are extra large, black heart-shaped, purplish-red fleshed, of wonderful quality. The Record-Bearing strain trees from which we propagated these strains stand in famous western cherry orchards. The owners report "These strains are 100 percent better than any other Black Tartarian I ever saw."

Bing

Early Sweet. Dark Red. One of the most delicious large deep red sweet cherries—succeeds in all cherry sections. Our Record-Bearing strain is hardy and bears heavily. A favorite with orchardists and a money maker.

Napoleon

(Royal Ann) *Sweet.* Yellow. A large yellow late ripening sweet cherry that is largely grown everywhere. Ours is the best selected Record-Bearing strain.

Other Varieties

In addition to those described above we offer New Burbank Cherries (page 16), also Governor Wood and Windsor. See Price List on Page 27.

America's Best Plums–Stark "Record-Bearing" Strains

Stark Green Gage

Mid-Season. Most delicious flavor of all except the new Burbank plums. Originated by us. Our propagation from a Record-Bearing tree on our grounds. Best of all the Gages. Fruit large, juicy, greenish yellow, exquisite quality. Tree strong grower, bears immense crops. This glorious plum is not planted in the home orchards of America as largely as it should be. We recommend it along with Omaha, Gold, Early Gold, America and Elephant Heart.

America

Early. Red. A Burbank production—a cross between Burbank (Japanese) and Robinson (Native). It is a variety that can always be depended on for a crop, tree large, thoroughly hardy, bears young and every year. It is a large glossy coral red plum with solid flesh and delicious quality. On the market it is popular and holds up well—for home use it ranks with the best ones. Should be more largely planted.

Omaha

Mid-Season. The finest sweet "Iron-clad hardy" red plum, possessing wonderful hardiness and thriftiness of tree, size, quality and beauty of fruit. Omaha originated in Nebraska and was introduced by us. Our trees are grown from the best Record-Bearing tree propagated direct from Original Tree. Large, dark red plum with small pit, meaty yellow flesh, sweet and delicious. The money-making plum for the far north and everywhere.

Gold

(Trade-mark) *Our $3000 Plum—Mid-Season.* Originated by Luther Burbank and introduced by us many years ago. It has made more friends among plum growers than any other plum ever introduced. Fruit is very large, clear semi-transparent golden yellow, later overspread with bright carmine blush, when fully ripe. Healthy and hardy tree succeeds wonderfully in chicken yards and thrives on moderately dry, thin clay soils. We propagate from a heavy Record-Bearing strain. You can obtain Genuine Gold Plum trees ONLY from Stark Bro's.

Early Gold

(Shiro) *Very Early.* Marvelously beautiful transparent golden yellow plum, extra large size, handsome as a plum can be—sweet and delicious. Tree hardy, bears regularly. Succeeds well in north and one of the greatest plums for south.

German Prune

Mid-Season. We have tested all the known varieties of prunes and selected this as best, except New Burbank Prunes. Large dark blue, juicy, delicious. Largely grown in all prune growing communities.

Indian Blood

(Duarte) *Mid-Season.* A large egg-shaped plum with blood red flesh. Delicious quality.

Stark Giant Damson

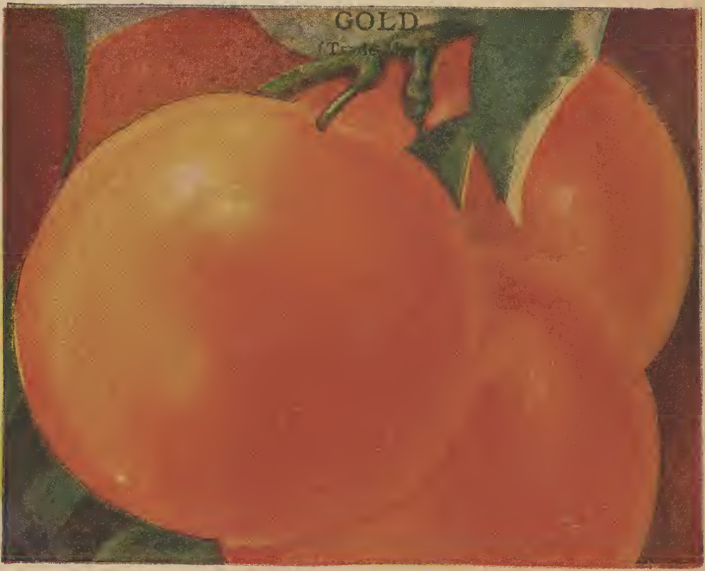
(Big Mackey) *Late.* Largest and best Damson. Originated in Pike County, Missouri. Our propagation is from second generation Record-Bearing tree with tremendous crop record of extra size fruit. These Damsons are easy to grow, produce immense crops, are money makers.

Santa Rosa

Early. A production of Luther Burbank. One of the largest, most beautiful, most luscious. Dark crimson, mottled red flesh, immense size.

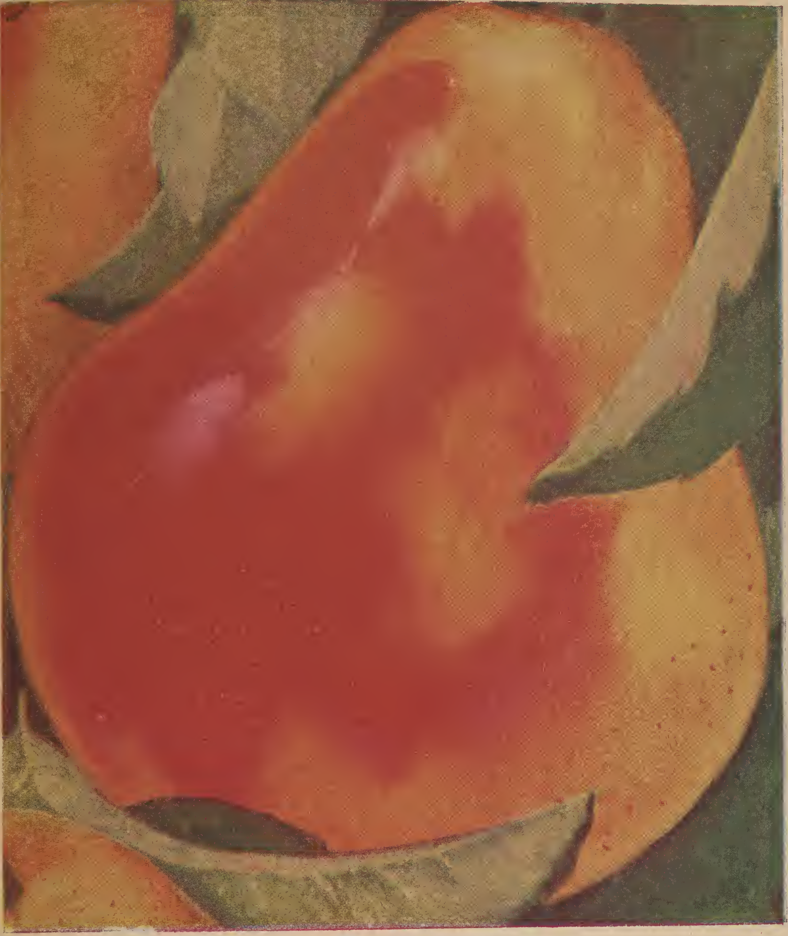
Other Varieties

See Price List.



GOLD—Our $3000 Trade Mark Plum

Prices of Cherries and Plums on Pages 27-28



Lincoln—King of All Pears

America's Best Pears

All are Stark RECORD BEARING Strains

LINCOLN—King of Pears

Late Summer. Our Genuine ORIGINAL TREE Strain. Best all-around, all-purpose pear for the Middle West and East. Fruit averages larger than Bartlett; clear, beautiful glossy yellow. Good shipper, superb quality—many claim even better than Bartlett. Tree remarkably *hardy and blight resistant*, long lived. Heavy cropper, should be thinned for largest size. Our propagation direct through Original Lincoln tree on grounds of W. E. Jones, Logan Co., Ill. When we first offered Lincoln, we claimed it to be as hardy as an Oak—and experience has borne out this statement. Has borne enormous crops every year, since first coming into bearing. Fruit has always brought best prices. In our orchard has outlived and outborne over 50 varieties and blighted very little while many other varieties have blighted to death. After 30 years' experience with Lincoln we still recommend it as the best. It thrives where many pears fail.

"Lincoln more blight resistant than any other; equals Bartlett in flavor and texture."—J. W. Jones, Emmet Co., Idaho.

"Lincoln did not show a trace of blight. Trees standing within 15 feet blighted to the ground."—W. C. Wilson, Rock Island Co., Illinois.

Anjou *Late Fall*. We propagate Anjou from Special Record-Bearing hardy Missouri tree, producing fruit of superior value and perfect type. Fruit large, handsome yellow, often blushed red and rich flavor. A long keeper—holds up well on market, very showy, commands best prices. Tree upright in growth, good bearer, strong grower, hardy, *young bearer*, blooms late, remarkably *free from blight*. Fall and winter storage markets are always eager for Anjou and pay good money for them.

"Good size, excellent quality. Begins to ripen in October and keeps until midwinter. Tree hardy, bears well."—U. S. Pomologist.

Kieffer *Winter*. The best known, most widely planted *winter* pear of extra large size, rich golden yellow tinted with red, beautiful, when full ripe is fine for canning and baking—fair quality. Tree vigorous, young, regular and heavy bearer—outbears everything in our orchards. East of the Rocky Mountains it is the money-making pear for the millions.

Stark Tyson *Very Early Summer*. This delicious pear has been called "The Summer Seckel"—and this description fits it perfectly. About the size of Seckel and very similar quality—melting, juicy, fine. Our propagation is from a select Record-Bearing strain, larger and better than the old Tyson, and more valuable. Every home orchard should contain at least one Tyson tree.

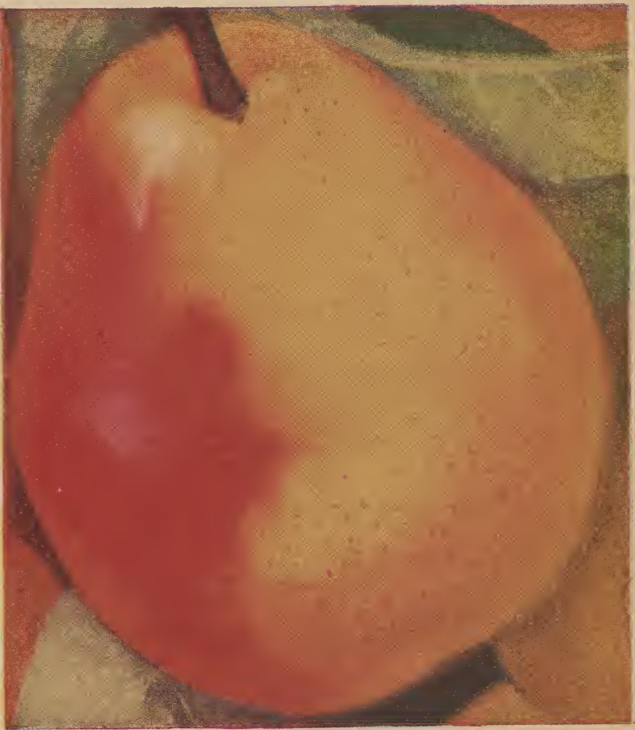
Stark Seckel (Sugar Pear). *Late Summer*. Improved Record-Bearing strain of Seckel has been grown by us for years and propagation kept pure. Fruit is medium size, spicy honeyed flavor and has been for generations the highest standard of quality. No other pear can take its place. Brings top prices. More should be grown. Tree hardy, thrifty and blight resistant.

Bartlett *Summer*. A World Wide Favorite with delicious quality and superb beauty that has made it the standard on all markets. Large rich golden yellow with red blush; juicy, melting, with rich indescribable flavor that has made it the most popular flavored pear. In the great pear sections of the west, Bartlett, Anjou and Buerre Bosc are largely planted commercially and are shipped by train loads to eastern markets. The tree is a strong grower, but sometimes blights. Bears young, bears large crops regularly. Our propagation is from a Record-Bearing tree in the Stark-Burbank Test grounds which we have watched for years. It is a typical Bartlett that has been more blight resistant than others. Bears enormous crops regularly and fruit has averaged extra large. Bartlett, Stark Seckel and Lincoln are our choice for high quality pears.

Fame (Trade-Mark). *Late Autumn*. A pear of delicious quality, juicy, melting, sweet and rich—no pear more delicious. A fine smooth grained fruit, greenish yellow, slight bronze on exposed side, few seeds and practically no core. A hardy Native American pear, originating in northern Arkansas. Hardy, strong, long-lived tree, young bearer—blight resistant. We introduced Fame many years ago and still recommend it as one of the best varieties for planting throughout America east of the Rocky Mountains.

Duchess (Angouleme). *Fall*. Our Record-Bearing strain is young bearing, often fruiting the second season after planting. The fruit is extremely large (often weigh over a pound each), greenish yellow, spotted with russet with white rich flesh and excellent quality. Probably the most satisfactory home orchard and kitchen pear. The tree is long lived, healthy, hardy, bears extremely young and produces enormous crops. Has been a favorite for generations and is still one of the best. Should be planted in all home orchards.

Beurre Bosc *Fall*. A large, long shaped, beautiful, deep yellow commercial pear that is juicy, extra sweet and of excellent quality. Its peculiar shape makes it very attractive on the fruit stands and it has always shown good profits to the grower.



Stark Seckel Improved—Sugar Pear

Hicks Grape—A Super Concord

Stark WORLD'S FAIR Grapes

Hicks A Super-Concord Grape (See photograph above of a typical bunch of this wonderful variety). Our tests prove it to be a **MOST VALUABLE BLACK GRAPE.** Pure Concord type but larger and better than old Concord. Better grower and heavier bearer. Vine healthy, hardy, bears large compact bunch. Delightful eating grape—makes better jelly and grape juice. In great market demand at best prices. **Very Highly Recommended by N. Y. Expr. Station.** Introduced by Stark Bro's.

Stark Delicious This fine **RED GRAPE** is all sold out for Spring 1935.

Stark Eclipse (Trade Mark) Earliest **blue black** grape. Ripens week ahead of Moore Early. Almost as large as Concord. Very finest quality. Does not crack in wet weather. Earliness and flavor make it big money maker for growers. **Vines scarce**—order early. **Sold Only By Stark Bro's.**

Brighton Bright **RED** grape, large heavily shouldered bunch. One of sweetest, most delicious grapes. Ripens ahead of Worden. Plant with Diamond or Worden for proper pollenization.

Campbell Early Black early large size—ripens about in Moore Early season. Good quality, very little foxiness and sweet. Most vigorous grower, produces good crops and hardy.

Catawba A Favorite sweet red grape. Fine for Wine, likes warm locations.

Concord Most widely grown, most popular **black** grape. Vine healthy, hardy, very vigorous, both bunch and berry large, produces more fruit than any except Hicks.

Diamond Best early ripening delicious **white** grape. Seedling of Concord crossed with Iona with all the Concord vigor of vine. Because it possesses most Old World blood it makes fine white wine and grape juice.

Lucile A beautiful bright **red** grape that ripens very early. Berry and bunch are large in size. Quality excellent and one of the best shippers. Vine very vigorous, hardy, productive.

Moore Early Similar to Concord in appearance and quality but ripens two weeks earlier. Leading standard **black** grape of its season. Bunch and berry large. Quality good. Vine healthy, vigorous, hardy, bears heavily.

Niagara "The White Concord." Most widely planted and the best known **white** grape. Vine ranks with Concord in vigor and productiveness. Bunch large, fruit of wonderful flavor. The white grape for the millions.

Worden A splendid **black** grape of Concord type and having Concord's heavy bearing habit. Ripens ten days earlier. Bunch large and fruit excellent quality.

We can also supply Delaware, Clinton and most any other grape obtainable elsewhere.

Flaming Giant Red Raspberry

Cumberland Raspberry

Stark's Preferred Berries

Flaming Giant— World's Record Red Raspberry

Sold ONLY by Stark Bro's.—It was from Prof. N. E. Hansen, M. S., Vice-Director Horticulture, South Dakota Exper. Station, that the first Flaming Giant (Ohta) Red Raspberry came to us. Now after years of most severe testing we must admit it to be the greatest, **hardiest** red raspberry in plant and fruit. Perfect after an early freeze of 15 degrees below zero when Cuthbert and Sunbeam were killed. Berries extremely large, rich alluring red, firm flesh, excellent shipper and supreme quality. Because of their beauty they always bring premium prices. **Hardy** far north—succeeds also far south. "Outbears Cuthbert two to one." Flaming Giant and Redpath (our Improved Mosaic free strain of Latham) are the two great red raspberries of this age.

"I never saw anything in my life like Flaming Giant. They are as perfect here as nature can make them. There never was a berry in the south equal to it."—E. L. Morris, Fayette Co., Tenn.

"Hoaie Harper of Marshall Co. Ky., made $300.00 an acre off his **Flaming Giant** Raspberries' first year bearing. Allen Johnson cleared $512.50 from 1½ acres. Flaming Giants do not winter kill."—Capper's Farmer.

Stark Raspberries—Currants—Gooseberries

Redpath **Latham Improved**—(Mosaic Free Strain) No **Red** Raspberry introduced within recent years has created so much favorable discussion as the Genuine Redpath Latham. Originated in Minnesota and has extreme hardiness. The true Redpath Strain we grow is "Mosaic Free."

Very strong growing plant, produces tremendous crop. Berries almost double size other red raspberries. Fine quality. Our Mosaic Free Redpath Latham is best and most profitable of all red raspberries, except Flaming Giant.

In a test before the Horticultural Society of Kentucky, 17,000 berries were counted and weighed and taking the size of true Latham as 100. Cuthbert was 67 and St. Regis was 54. This shows the almost unbelievable size of this berry.

Chief 10 days EARLIER than Latham. Minn. Exper. Station selected CHIEF from 4,000 Latham Seedlings because of its earliness, excellent quality, heavy crops, hardiness, disease resistance.

St. Regis Everbearing A real everbearing **red** raspberry. Produces luscious fruit from early until late. Berries bright crimson, delicious, firm.

Columbian Mid-season Purple. Best of all **purple** raspberries; fruit large, firm, of good quality—plant hardy—bears big crops. In most sections it produces a moderate Fall Crop in addition to the regular summer crop.

Cumberland Our largest selling **black** raspberry. Early black cap raspberry. By far most widely planted, most successful and most profitable. Hardy, vigorous grower, extraordinarily productive. Largest fruit, excellent quality, ships well. Most valuable black raspberry for commercial and home growers.

Black Pearl Early season **black** cap. Berry large, good quality and plant good cropper, however, we still prefer Cumberland.

Cuthbert A **RED** mid-season variety. Probably the most widely planted of all red raspberries. Fruit large, firm juicy, good quality, good shipper and is popular on all markets. We prefer Flaming Giant and Redpath Improved Latham.

Perfection Currants (Early Red). Very large, best of new currants. Deliciously flavored. productive, vigorous, healthy. Hardy, resistant to mildew. Ships well.

London Market (Red) One of the best known and most profitable currants. Brilliant red, good quality, most resistant to diseases—heavy cropper. Large.

Downing Gooseberries Largest successful American variety. Attractive light green, excellent quality. Vigorous, productive, healthy, resistant to mildew.

Houghton Widely planted gooseberry and most profitable. Berry light silvery green turning dark red when fully ripe. Vigorous and hardy.

Josselyn (Red Jacket) Early, extra large, light red berry of best quality. Vigorous, mildew free gooseberry.

Stark Blackberries—Garden Roots

Mersereau Mid-season; our most popular blackberry. Beautiful glossy blackberry—larger, better quality than Snyder, holds up well. Mersereau is not as upright in growth as some blackberries, having a tendency to trail on the ground unless trained.

Early Harvest Very early. Standard blackberry. Popular for many years. Medium size, glossy black, good flavor, good shipper and canner. Not as large or good as Eldorado or Mersereau.

Eldorado Mid-season ripening, jet black berry, enormous size. Plants strong growing, hardy, bear regular heavy crops. Holds up well after picking, ships well. One of the very best blackberries. Mersereau and Eldorado are preferred by canners and used for that purpose in large quantities.

Blowers (Everbearing). Very large, jet black, extremely sweet and excellent flavor. Vine hardy, rugged, good bearer. Fruit ships well.

Snyder Well known variety. Size, medium to large. Plant hardy, dependable. Not as valuable as Eldorado or Mersereau.

Early King Good early bearer, nearly coreless, size medium to large, ripens with Early Harvest but better quality. Recommended for home planting.

Lucretia Dewberry Jet black, large, best quality—most dependable dewberry.

We also supply **ASPARAGUS, RHUBARB** and **HORSERADISH** Roots. See **PRICE LIST.**

For Other Grapes and Berries—SEE PRICE LIST

STARK World's Fair ROSES

NEW and U. S. PATENTED ROSES

Golden Sunset **Burbank's New Climber NEW U. S. PATENTED** Most gorgeous, **large,** yellow, climbing, double rose we have ever tested. A **true rich yellow** climber **hardy** enough to **live, thrive** and **produce profusely** even where winters are very cold. Very **large** blooms of glowing golden yellow, with curled, cupped petals, often tipped with orange red—**exquisitely beautiful.** Borne on long, graceful stems. Its unique "holly-like", glossy, dark green foliage adds tremendously to it. summerlike beauty. SUPPLY LIMITED—ORDER EARLY!

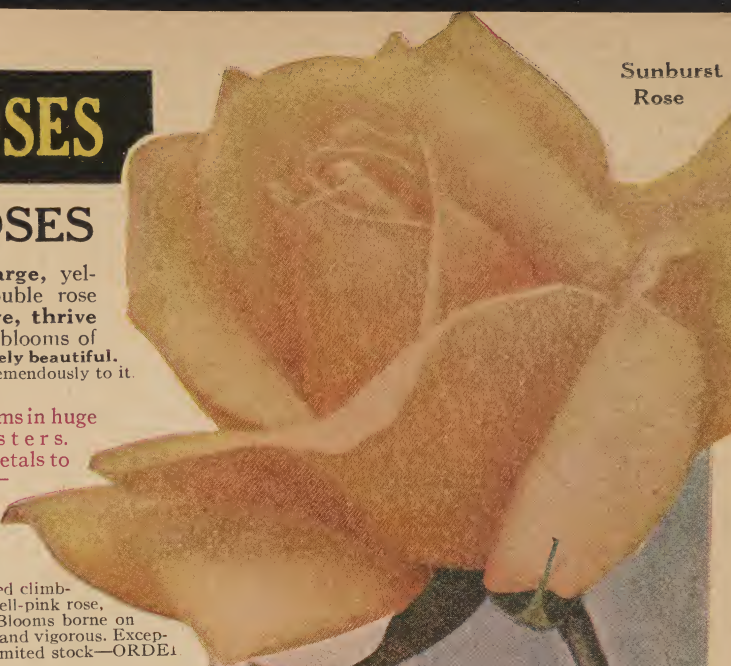
Burbank's APPLE BLOSSOM **U.S. PATENTED Climbing Rose** Blooms in huge clusters. Open flowers shade from exquisite apple blossom pink at margin of crinkled petals to lighter iridescent centers in tints too beautiful to describe. **Hardy**—very **vigorous** grower—handsome foliage. Very long season of bloom. Fine for entrance or pergola planting. Trained on fence, makes a gorgeous hedge. SUPPLY LIMITED—ORDER EARLY!

Scarlet Flame **Everblooming. NEW** prolific blooming **bush rose.** Wonderful for rose bed. Brilliant **red,** fragrant, large double rose. Petals recurved, fringed. Resembles Gruss an Teplitz but almost **twice as vigorous,** larger, finer color, more abundant blooms. Healthy, disease-resistant and HARDY. LIMITED SUPPLY—ORDER EARLY.

Yellow Baby SUNBEAM **Burbank's** Bears abundance of great clusters dainty, salmon-pointed golden apricot buds, which open to light apricot with pink tinge and tone to creamy sun yellow. Very distinctive. ORDER EARLY.

Blushing Beauty
Burbank's NEW Pink Climber
LARGE, striking, cerise pink-edged climbing rose. A unique three-toned, shell-pink rose, **larger** than the Dr. Van Fleet. Blooms borne on long stems. VERY healthy, hardy and vigorous. Exceptional LONG blooming season. Limited stock—ORDER EARLY.

SILVER PRINCESS **Everblooming.** Salmon yellow to delicate pink puds open to extra large, ivory-white, pink-tinged roses. Extra thrifty, healthy. Blooms constantly, even in hot, dry weather. ORDER EARLY.



Sunburst Rose

Stark EVERBLOOMING HYBRID TEA Roses

Etoile de Hollande **Brilliant Red Everbloomer.** A gorgeous large rose of surpassing beauty. The medium large, deliciously fragrant bright red buds and flowers dominate the garden in fiery brilliance and keep well when cut. Long stout stem with few thorns—vigorous, upright growth. Disease resistant. A cross between Hadley and Gen. McArthur. Destined to great popularity.

Red Radiance **Red Everbloomer. Peer of ALL Red Rose Bushes.** Gorgeous deep red blooms. Exquisitely shaped buds. Ideal for cutting and always in bloom. Amazingly **VIGOROUS** and sturdy—will flourish and produce great profusion of wonderful roses in almost any soil or climate. Particularly fine for bedding. Will succeed where other varieties fail.

Sunburst **Yellow Everbloomer** (See illustration upper right corner.) One of the **very finest yellow, everblooming roses ever created.** Delightfully beautiful, with extremely long, orange-yellow buds of entrancing fragrance. **Blooms continuously.** Long stems and handsome foliage. Sure to please all golden rose lovers.

Gruss an Teplitz **Red Everbloomer** (China). A great old favorite. Velvety crimson and highly fragrant. Blooms in open clusters profusely the whole season. Splendid bedding rose. Great outdoor rose for garden beautifying. **HARDY** and vigorous. Burbank's Scarlet Flame, however, is a better red everbloomer.

Kaiserin A. Viktoria **The most perfect WHITE everbloomer.** Compact, shapely, pointed buds turn into pure snow-white double blooms of wondrous size, beauty and fragrance. Fine for cutting. Very bushy growth-habit.

J. L. Mock **Pink Everbloomer.** A magnificent rose whose loveliness is beyond words of description. **Extra large blooms** borne on graceful long stems. Petals silvery pink on inside and **deep bright pink** on outside. **Bears all summer long.**

Mme. E. Herriott **Copper Yellow Everbloomer.** **Large,** unusual rose that **WON DAILY MAIL PRIZE.** Semi-double flowers. Brilliant **orange-red and salmon.** Vigorous, bushy, free-blooming. It will delight you.

Rev. Page-Roberts **Salmon Yellow Everbloomer.** (**Pernet**) NEW, big, shapely blooms—golden-yellow tinted outside with red and orange. Wonful cutting rose.

Baby Rambler **Red — Pink — White.** Flowers borne in clusters similar to Rambler Rose—but dwarf growth. Rarely over 1½ ft. high. Blooms June to frost. Fine for bed or dwarf Rose hedge. HARDY. We supply either **Red, Pink** or **White.**

Radiance **Pink Everbloomer. Most popular pink everbloomer.** Most easily grown. Superb, **large,** compact buds and large, fragrant, beautifully shaped pink flowers, borne on long stems. **Full of blooms from spring until frost.** Most reliable Hybrid Tea Rose.

Mrs. Chas. Bell **Light Pink Everbloomer.** A sport of Radiance. Finer, softer, **lovelier shell pink** buds. Blooms of soft salmon pink. Very fragrant. Graceful long stems. Very vigorous. Continuous bloomer. A fit teammate to Radiance and Red Radiance.

W. R. Smith **Pink Everbloomer.** Lon pointed buds open into **very large,** double fragrant blooms. Outside petals **delicate pink.** Centers **creamy white.** Continuous bloomer. Splendid for beds.

Mrs. Aaron Ward **Light Yellow Everbloomer.** Fragrant, pointed buds of **rich yellow,** opening into **golden yellow** double roses. Profuse blooms all summer.

Countess Vandal **U. S. Pat. No. 38.** The sensation of the flower shows. Its long pointed buds, its beautiful distinctive shading of coppery bronze suffused with soft gold, combined with a vigorous plant which blooms unceasingly throughout the summer make it a favorite in the gardens of rose-lovers.

Souvenir **U. S. Pat. No. 25.** The outstanding gold-medal winner in the 1932 flower shows. Its bloom is a rich, deep golden yellow, and it is a prolific producer of fragrant flowers for cutting. One of the best sellers of the season.

HYBRID PERPETUALS

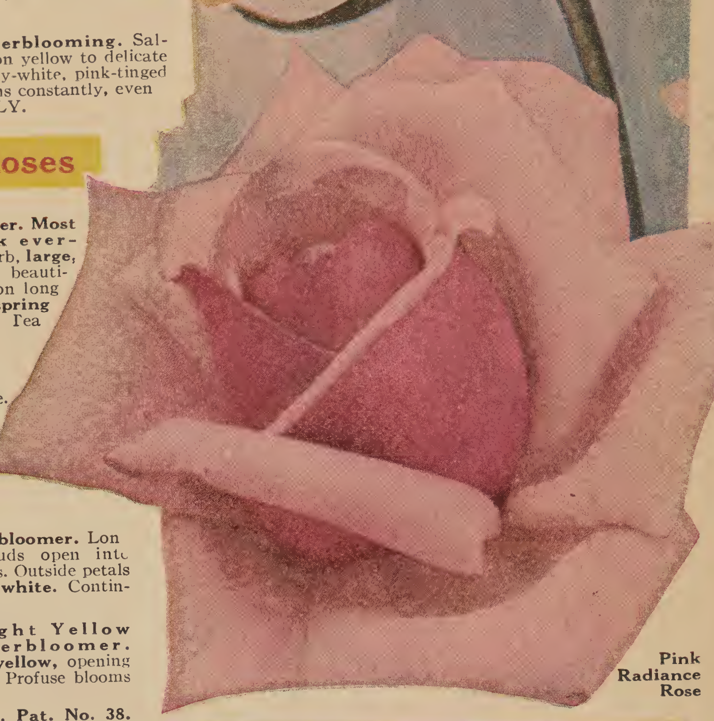
Snow Queen **White.** Best of its type. Largest **pure white** rose known. Also known as 'White American Beauty". Graceful long, strong stems. Wonderful for cutting. Blooms throughout whole summer if cared for.

J. B. Clark **Red.** Profuse bloomer with large, shapely buds. **Bright crimson** blooms often 3 inches or more across. Most **vigorous** grower. HARDY. Has habit of blooming second time in Fall.

Ulrich Brunner **Dark Red. Very profuse bloomer.** Literally covered in June with **large, cherry-red,** fragrant blooms. A magnificent garden rose. Very vigorous and HARDY.

Paul Neyron **Pink.** Probably **largest** bright pink rose. Often blooms late summer and fall. Very vigorous.

For Other Varieties See Page 29



Pink Radiance Rose

Stark CLIMBING ROSES

Blaze—Red **New U. S. Patented Rose.** Very beautiful new **everblooming climber** as vivid, fiery red as Paul's Scarlet. Bloom is larger, however. Bears great clusters of blazing scarlet blooms.

Climbing American Beauty Popular **early** bloomer. Produces profusion of huge blooms of gorgeous American Beauty color—often 3 in. across. Borne on graceful **long stems.** Very desirable climbing roses for cutting. Trained on porch trellis; it makes magnificent effect—vines literally covered. **Hardy.**

Paul's Scarlet Vivid **Scarlet.** Early bloomer. Large flowers in clusters add a vivid, flaming flash of color to your garden. **Color does not fade** and its brilliant display lasts for weeks.

Gardenia **Yellow**—Early. Small, deep yellow, Tea-Rose shaped buds open into rich cream-colored blooms. Very fragrant.

Dr. W. Van Fleet Most desirable **hardy** climber. Long-stemmed flowers—lovely apple-blossom color. Blooms profusely in midseason.

Excelsa "**Red** Dorothy Perkins". Better than old Crimson Rambler. Lasts for weeks. **Hardy.**

Dorothy Perkins Very vigorous and **hardy.** Profusion of clusters of **bright rosy pink** blooms make it wondrously beautiful in late spring.

Everblooming Crimson Rambler (Polyantha) Similar to Crimson Rambler, but is an everbloomer. It is rugged and hardy and will grow anywhere.

American Pillar Large, **pink** flowers in hundreds of clusters make it a veritable blaze of glory. **Hardy.** Late bloomer.

Complete List of Roses and Rose Prices on Page 29

Stark Quality Shrubs Have Extra Heavy Roots, Big, Bushy Tops—Start Quickly—Grow Faster

Stark WORLD'S FAIR Flowering Shrubs

Spirea, Vanhoutte (*Spiraea vanhouttei*). **Illustrated below.** Rightly termed the one best shrub for all purposes, and sometimes called "Bridal Wreath." Its graceful arching branches are completely covered in May with showy white flowers. Useful for foundation planting, as a flowering hedge, in the shrub border, or as specimen plant. Perfectly hardy.

Butterfly Bush (*Buddleia davidi "magnifica"*). **Illustrated below.** A continuous bloom from July until frost, bearing long spikes of fragrant, brilliant lilac flowers having orange centers, which attract large numbers of butterflies. Top generally dies back to ground during winter in northern latitudes, then springs into vigorous growth again in the spring.

Forsythia, Border (*Forsythia intermedia*). **Illustrated below.** First shrub to bloom in spring. Its bright yellow, bell-shaped flowers literally cover the plant before its leaves appear. The foliage is equally fine. This variety attains a height of five or six feet and is rapid in growth. Useful for borders, entrance or foundation planting. Also known as Golden Bell.

Mockorange, Sweet (*Philadelphus coronarius*) **Illustrated below.** An old-time shrub, still deserving and popular. The large white blooms of orange-blossom fragrance are borne profusely in May and June. It is one of the best tall-growing shrubs for screen effect. Can be used for tall, informal hedge. Attains a height of ten to twelve feet.

Aralia, Five-Leaf (*Acanthopanax pentaphyllum*). Tall upright growing shrub. Dark, glossy green foliage and prickly branches. Very hardy. Height 6 feet. Flowers clustered, greenish white. For tall hedge or border planting.

Arrowwood (*Viburnum dentatum*). A form of Snowball, with bright green leaves that turn purple and red in fall. Creamy-white flowers in May. Succeeds anywhere. Height 8 feet.

Barberry, Japanese (*Berberis thunbergi*). Compact, graceful shrub or hedge plant. Beautiful orange-red foliage and bright red berries in fall. Extra hardy. Fine for foundation, border or hedge.

Barberry, Red-Leaf (*B. thun. atropurpurea*). A new, showy, red-leaf form of Japanese Barberry. Very popular shrub or hedge plant. Height 3 feet. Admired by everyone.

Cranberry Bush, American (*Viburnum americanum*). Large, flat heads of white flowers in May, followed by clusters of bright red berries. Red and yellow foliage in fall. Height 8 feet.

Deutzia, Pride of Rochester (*Deutzia scabra*). Rapid growing shrub, ideal for borders or screen planting. Double flowers, white, outer petals tipped pink. Height 5 feet.

Deutzia, Slender (*Deutzia gracilis*). Of dense and dwarf habit. Pure white, single, bell-shaped flowers, entirely covering bush in May. Height 2 feet. Fine for borders and foundations.

Dogwood, White Flowering (*Cornus florida*). Tall shrub or **small tree.** Large, white, four-petaled blooms in early spring. Bright red berries and crimson leaves in fall.

Elder, Golden (*Sambucus canadensis aurea*). Bright golden yellow foliage throughout season. Very hardy. Rapid growth. Fine for quick screen planting.

Euonymus, Winged (*Euonymus Alatus*). Unusual shrub with corky flanges on bark. Glossy green foliage. Very beautiful in autumn with its scarlet foliage. Height 6 to 8 feet.

Flowering Almond (*Prunus Glandulosa*). A beautiful dwarf shrub literally covered with double, pink, rose-like flowers in very early Spring before the leaves appear.

Forsythia, Fortune (*For. Fortunei*). A very showy early blooming shrub with golden yellow, bell-shaped flowers. An ideal shrub for border, specimen or foundation planting.

Honeysuckle, Morrow (*Lonicera morrowi*). Good shrub for foundation or border. Medium height. Flowers, white, later turning yellow. Fragrant. Grows rapidly. Attractive foliage. Very hardy.

Honeysuckle, Winter (*Lonicera fragrantissima*). Very fragrant pinkish white flowers in early spring. Fine for tall hedges and specimens. Foliage often hangs on until late winter.

Hydrangea, Peegee (*Hydrangea paniculata grandiflora*). Showy, enormous flowered shrub. May be kept in bush form or trained to small tree form. Flowers July and August, big white blooms changing to pink.

Hydrangea, Snowhill (*Hydrangea arborescens grandiflora*). Everblooming from June to frost. Flowers often 10 inches across, pure white. Height, 4 feet. Fine for foundation or border planting.

Kerria, Double (*Kerria japonica flore-pleno*). Most beautiful. Bright yellow double flowers spring until late fall Bright green branches. Height 3 feet.

Lilac, Common Purple (*Syringa vulgaris*). Large clusters fragrant purple flowers. Very hardy. Height 10 feet.

Lilac, Ludwig Spaeth (*French budded Lilac*). Most beautiful of large flowered imported French lilacs. Gorgeous dark purple-red flowers.

Lilac, Persian (*Syringa persica*). Profuse bloomer. Delicate, fragrant, lavender, flower clusters cover whole bush. Height 6 feet.

Lilac, Pres. Grevy (*French budded lilac*). Finest, largest, **double-blue** blooms in great clusters. Best French lilac.

Lilac, Villosa (*Syringa Villosa*). A beautiful lilac with corolla-tube of Laelia Pink and lobes of pale persian lilac, tinged with white near throat and anthers of primrose yellow. Dense, sturdy bush of medium height. Late Blooming in large Clusters—May and June.

Mockorange, Lemoine (*Philadelphus lemoinei*). A most attractive shrub. Slender, drooping branches. Delicate orange-like, fragrant blossoms. Dwarf.

Make Your Home Bloom with Beauty

Althea, Shrub (*Hibiscus syriacus*). **Illustrated below.** Wonderfully attractive. Upright growth. Height 5 to 6 ft. Flowers profusely from August until frost, when many shrubs are through blooming. Blooms often 3 inches across—colors: **Double Red, Double Purple, Double Rose.** Excellent border shrub. Also fine flowering hedge plant.

Spirea, Billiard (*Spiraea billiardi*). **Illustrated below.** An upright-growing Spirea attaining a height of 4 to 6 feet. Beautiful long spikes or plumes of pink flowers from July until frost; especially fine for using in bouquets. Succeeds even in dry locations. A fine shrub for foundation and border planting.

Jetbead (*Rhodotypos kerrioides*). **Illustrated below.** Attractive crinkly foliage and white flowers resembling Mockorange, in May and June, and also in fall. The ebony-black, shiny seeds are attractive in fall and winter. Attains a height of four feet. Sun or shade. An attractive shrub for border or foundation planting.

Snowball, White (*Viburnum opulus sterile*). Also called "Guelder Rose." Old favorite, tall-growing shrub popular for years. Literally a huge snowbank when in flower. Most attractive for Decoration Day as they are usually in full bloom at that time. Rapid growing—extremely hardy.

Spirea, Thunberg (*Spirea thungergi*). **Illustrated below.** A most beautiful, semi-dwarf Spirea. A mass of snow-white flowers in early Spring before leaves appear. Slender, gracefully arched branches. Foliage beautiful in Fall. Most desirable for border or foundation planting.

Honeysuckle, Red Bush (*Lonicera tatarica siberica*). A shrub of rapid growth. Desirable as a tall spreading hedge for screen effect. Attains height of 8 feet. Thrives in either shade or sun. Deep pink flowers followed by showy red berries. Very popular.

Mockorange, Virginal (*Philadelphus virginal*). Most beautiful white flowering shrub introduced recently. Flowers in June—over long period. Double, fragrant blooms 2 inches across.

Privet, Regel (*Ligustrum regelianum*). Medium height shrub. Slightly drooping branches. Fragrant, creamy white flowers in June. Good on north and east side of house.

Quince, Flowering Japan (*Cydonia japonica*). Also called Burning Bush. One of earliest blooming shrubs. Covered with large, bright scarlet flowers in May.

Red Bud, American (*Cercis canadensis*). Small tree, bright magenta, pea-shaped flowers before leaves appear. Splendid for group or naturalized plantings. Very hardy.

Rose, Japanese (*Rosa Rugosa*). *See Price List under Roses.* Medium height shrub rose. Crinkly, dark green foliage. Fragrant, pink flowers and large orange-red berries.

Rose, Japanese White (*Rosa Rugosa Alba*). *See Price List under Shrub Roses.* Blooms almost continuously with clusters of large white flowers followed by orange-red berries. Height 3 to 4 feet. Suitable for shrub border or informal hedge.

Shadblow, Downy or Juneberry (*Amelanchier canadensis*). Tall. Attractive white flowers very early Spring. Effective group or border planting. Beautiful for tall borders.

Snowberry, Garden (*Symphoricarros racemosus laevigatus*). Desirable dwarf shrub for border or foundation. Pure white berry clusters in fall. Good in partial shade.

Tamarix, African (*Tamarix africana*). Tall-growing shrub. Delicate, pale green foliage. Small, pink flowers thickly set on graceful stems. Height 8 feet.

Tamarix, Kashgar (*Tamarix hispida*). Dense growing. Gray-green foliage. Graceful, arching branches. Flowers coral-pink in long, upright pannicles. Midsummer.

Weigela, Pink (*Weigela rosea*). Bears profusion of rosy pink trumpet-shaped flowers several weeks in May and June. Height 6 to 8 feet.

Willow, Pussy (*Salix discolor*). Silver gray flower-buds attractive for cutting in Spring. Rapid growing. Attains height of 8 to 12 feet.

Graceful SHADE TREES

Maple, Silver (*Acer dasycarpum*). Rapid, easy grower. Large, spready tree. Hardy, long lived. Thrives in all soils. Beautiful lawn, street or park tree.

Poplar, Lombardy (*Populus nigra italica*). Picturesque Italian tree of slender, upright, rapid growing habit. Gives accent to planting. Screens unsightly views or buildings.

Catalpa, Umbrella (*Catalpa bungei*). Dwarf, compact, umbrella-shaped head. Quick grower—6 to 8 ft. tall. Succeeds everywhere in entrance and formal plantings.

Elm, American or White (*Ulmus americana*). The true vase-shaped type. Graceful, arching branches. Medium rapid grower. Succeeds everywhere as lawn and street tree.

Elm, Chinese (*Ulmus pumila*). New shade tree of great merit. Rapid, upright growth. Extra hardy.

Maple, Norway (*Acer plat.*). Beautiful, round headed tree—grows 40 ft. tall. Golden fall foliage. Long lived.

Stark's Better HEDGES

Privet, Amur North (*Ligustrum amurense*). Very hardy. Dense and best in most sections.

Privet, California (*Ligustrum ovalifolium*). Popular hedge. Not hardy north. Waxy, green foliage.

Barberry, Jap. (*Berberis Thunbergi*). Compact, requires little trimming. Ideal hedge—hardy.

Spirea, Vanhoutte (*See under Shrub list on P. 24.*)

A Home Orchard Will Feast YOUR Family

Home Orchard of G. B. Mays, Champaign Co., Ill., All Record-Bearing Strain Stark Trees. Last Year He Sold 47 bu. Of Cherries, 54 bu. Of Plums and 90 bu. Of Apples Besides All The Family Ate and Put Up For Winter Use. This Little Orchard-Vineyard Has Netted Him About $700.00 Profit Per Year For Years.

You have enough spare ground in your Home Yard or Farm to set out one of the home orchards offered below of a few trees that will bear all the fruit from early to late each season that your family can eat — plenty to "put up" for the balance of the year — and, **lots more that you can sell on a roadside stand or in nearby towns** — often paying for the trees with the first crop.

As Prof. T. J. Talbert, Missouri State Horticulturist, stated in the **Kansas City Star of March 23, "A Small Orchard Will Prove An Asset To The Farm."**

Prof. Talbert goes on further to say: "Many think that the home orchard will require an undue amount of work. **This is not true for the home orchard of one acre or less.**

"The prospective home orchardist should keep in mind the MAIN OBJECT OF THE HOME ORCHARD IS TO SUPPLY ENOUGH FRUIT FOR THE FAMILY. With proper care and attention, no similar area on the farm will produce for the time and labor employed as great returns to the **yearly food supply** of the family as the home orchard."

The "one crop" farming idea has been banished. All wise farmers know that they should raise some hogs, cattle, poultry and that they should plant other crops besides just corn or wheat. The basic idea of **RAISE MOST OF WHAT YOU EAT RIGHT ON YOUR OWN FARM** has again become the motto of shrewd farmers — for both health and economy. No farm is complete without a home orchard.

Orchard Experts selected the varieties in these Splendid Collections. If any variety becomes exhausted they will include a similar sort of equal worth.

No. 4 Collection:

"Big Leader" Orchard

$10 — For $14.25 Worth — You SAVE $4.25

Write **WHOLESALE** Dept. for Quantity Prices on 50 TREES or more. Use POST CARD enclosed.

On Orders of 50 Trees or More

Write Our WHOLESALE DEPT. For SPECIAL QUANTITY PRICES. Use POST CARD Enclosed.

MONEY BACK. In the event that any nursery stock sold by Seller Company proves untrue to name as labeled, Seller Company agrees, on satisfactory proof to it of such untrueness to name, to refill that portion of the order so proven to it to be untrue to name, or, at its option, to refund the purchase price paid therefor, and as the Seller Company does not give any warranty, express or implied, in respect to any nursery stock sold by it, the purchaser's or any one else's damages, if any, for any breach of this contract, or any special contract herein contained, by Seller Company, shall be limited to the refilling of that portion of the order, or to the refunding of the purchase price paid therefor, as above stated. Non-delivery of stock is excused in case of fire, frost, floods, drouth, strikes, shortage of nursery stock or other causes beyond seller's control.

WE REPLACE FREE As Follows: Stark Bro's desire is to satisfy every customer — that has been our policy for 119 years. We guarantee Stark Nursery Stock to reach the customer in good condition, and we will refill absolutely free any stock that does not reach customer in good condition, *provided we are notified immediately on arrival of order* so that we can make claim with the railroad or other transportation company. We do not replace nursery stock that fails to live. Possible neglect of planter and unavoidable climatic conditions prevent guaranteeing trees and plants to grow.

GET UP CLUB ORDERS — GET 10% FREE TREES — FREE FREIGHT

GET UP CLUBS among your neighbors and **save money for each one** — Get **FREE TREES** (where total Club orders amount to $20.00 or more); Get **lower rate and Free Freight** for larger quantity, etc. For your trouble **ADD to the Order FREE** of charge **Trees to the amount of 10% of Club Order.** These extra trees should go to the Club Maker, but of course may be divided.

INSPECTION. The Certificate of our State Entomologist is attached to all shipments. No diseased o infested trees are permitted in our nurseries.

PARCEL POST ORDERS. We can ship 3 to 5 ft. size trees or smaller by parcel post. Also grape vines, berry plants and small size Ornamentals.

PLANTING DISTANCES

APPLE—20 to 40 ft. apart.

General Offices of Stark Nurseries, and Executive Buildings in Beautiful Stark Park

Over a Century—119 Years Devoted to Creating Greater Fruit Tree Values

EVER since 1816—A Century and 19 Years Ago—it has been our privilege and pride to pioneer in the betterment of American nursery methods and fruit growing. It has seemed that our position as The Oldest Nursery in America has given us this great work as our responsibility and the public has confidently looked to us to provide the World with newer and better values in fruit trees and ornamentals.

These EXTRA VALUES are made possible ONLY by our More Than a Century of Successful Experience. They are not to be expected of a nursery with fewer years behind it.

An 8,000 Mile Search for Best Fruit Values

A few years ago, the Seabrook Farms of New Jersey decided to plant a **2000-acre orchard.** W. W. Oley, the Superintendent was told, "Go get the **finest fruit trees obtainable in the world.** Visit all the **best** nurseries. Do not **buy** a single tree until you **know** that you have found the best trees grown!"

He spent months in the search—investigated nurseries everywhere—**travelled over 8,000 miles in all.** Finally he came to our Louisiana, Mo. headquarters—toured through our branch nurseries—critically examined our methods of tree propagation, digging and packing—investigated our Century-taught systems of **assuring** true-to-name trees. And, when he was all through, **he bought 62,425 Stark Trees in preference to all others!** EXTRA VALUE not mere price, CONVINCED him. See photograph at bottom of page.

1

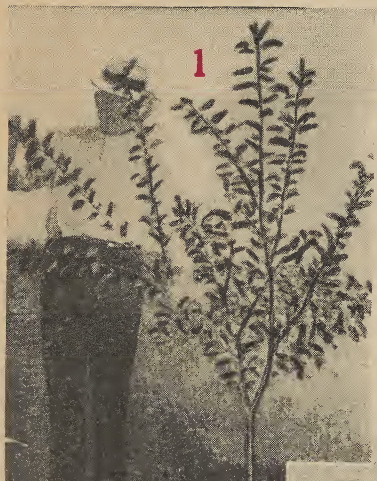

Photo No. 1 (above) shows the remarkable growth of Stark Record-Bearing Strain Old Oak Process Whole-Root Tree only 1 year and 3 months after planting.

—•—

2

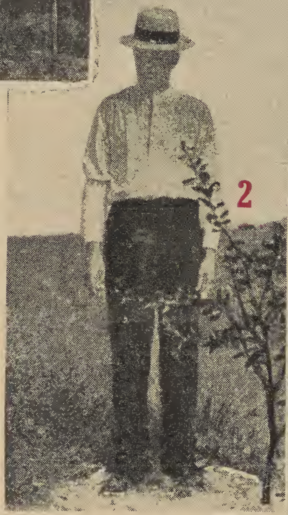

Photo No. 2 (at right) is that of another nursery's "cheap" tree also 1 year and 3 months after planting. Note weakling growth.

3

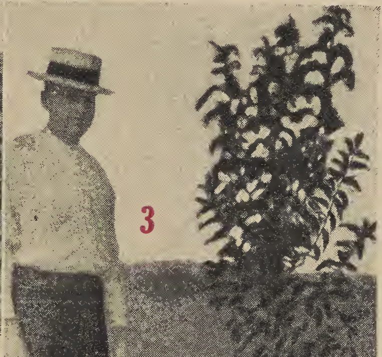

Photo No. 3 (at right) shows a Stark Tree only 3 months after planting. Even this very young Stark Tree is larger than the 15 months old "cheap" tree above.

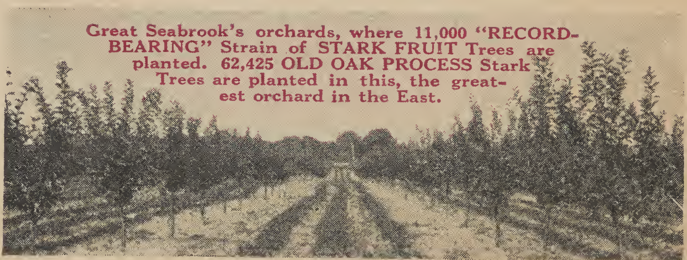
Louisiana, Mo., is Way up North Near the Iowa Line Where Winter Temperatures are often Below Zero. All Stark trees are hardy, vigorous and well matured. Photo below shows new Stark offices in mid-winter.

"Stark Trees Cheap at $5.00 Each Compared to Others as a Gift!"

—say Houser & Sutton, Newton Co., Illinois, "Last Spring we bought 800 trees (NOT Stark Trees) because of a so-called bargain price. Half of them proved worthless. About the same time we received a lot of Stark Trees. We planted the 'cheap' trees between the Stark Trees—Now—**Look at These Photos!** (at left) See the marked difference in the trees! That's **WHY** Stark Trees would be cheap at $5.00 compared to so-called 'cheap' trees as a gift!"

TREES STARK NURSERIES SEEDS



Great Seabrook's orchards, where 11,000 "RECORD-BEARING" Strain of STARK FRUIT Trees are planted. 62,425 OLD OAK PROCESS Stark Trees are planted in this, the greatest orchard in the East.

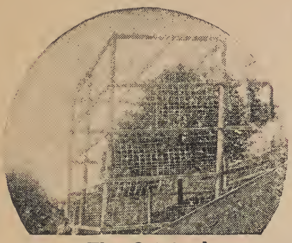
Prices of ALL Varieties—See Pages 26 to 29

Copyright 1935, Stark Bro's

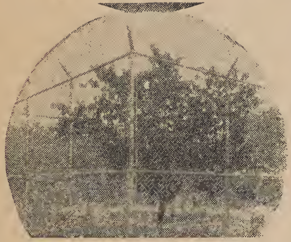
True "RECORD-BEARING" Trees Sold ONLY by Us

We Spent Over $50,000.00 to ASSURE You EXTRA Value

"You may win $1,000.00 by finding a new fruit or shrub and selling to us."



The Original Golden Delicious Tree



The Original Hal-Berta Giant Tree

The Original Starking Tree

Now, after years of investigation and **at the expense of more than $50,000.00,** we have changed **ALL** our varieties to "Record-Bearing" Strains. ALL Stark Trees are propagated from the best known Record-Bearing Parent Tree of each variety—or from trees scientifically proved to have superior bud variations and bud sport characteristics—with the ability to transmit to their offspring superior higher color and earlier color, uniformity of shape and type, greater crops, larger fruit.

Leading horticulturists and most successful orchardists, **in planting their own orchards,** prefer to plant Stark Trees that they **KNOW** have been propagated from Parent Trees of **KNOWN** Bearing Records. For instance, Prof. Green, for years Chief State Horticulturist of Ohio Experiment Station, stated:—

"If I were planting an orchard myself, I would prefer that the nursery stock I used would be propagated from trees of known records."

Prof. A. D. Shamel, in charge of U. S. Govt. Fruit Improvement investigations, says **"Of Great Value To Fruit Industry!"**

This Absolutely Assures Greater Tree Value

It preserves Superior Colored Strains, like Starking, etc. It perpetuates Heavy Bearing Types, such as Golden Delicious. It keeps "drone" trees out of Stark Trees. It prevents our best varieties from degeneration—and prevents best varieties from relapsing into degenerate, weak strains.

It preserves the habits of heavier, annual yields of better colored fruit, ideal shape, larger size and other better characteristics — and, thus, **assures better fruit, bigger crops and greater profits to those who plant Stark Trees.**

It Makes More Certain "True-to-Name" Trees

Our system of propagating **ONLY** from Record-Bearing Parent Trees of each variety, minimizes errors in propagation and, thus, is double assurance that **EVERY** Stark Tree is a True-To-Name tree.

Furthermore, every farmer and stockman now knows that he gains bigger crops from superior seed—gets finer stock from thoroughbred or pedigreed parents—and, while trees are not the product of two parents, their propagation from a Stark "Record-Bearing" Strain Parent Tree is of vast importance and of **GREATER VALUE** to the man who wants assurance of a reliable source of the best fruit trees and the biggest profits.

7 Branch Nurseries Help Us Give Greater Value

A Century and More of experience has **PROVEN** to us that there ARE a few, selected sections where specially adapted soil and conditions produce finer fruit trees of certain varieties—trees with a superabundance of vitality.

A Century of search and experiment have enabled us to locate these ideal sections. The Nation's greatest horticulturists have aided us in this work. Today we have Seven Tree Growing Plants or Nurseries located in New York, Pennsylvania, Arkansas, Missouri, Illinois, Oklahoma and Kansas. **This makes Stark Tree growing more costly to us**—but **it assures FULL OF LIFE, EXTRA VALUE trees** for you, our customers, at no increase in cost.

Over a million—4½ months old—OLD OAK PROCESS Ozark Mountain Stark Apple Trees.

AVERAGED $8,000.00 YEARLY ON 30 ACRES OF GENUINE STARK TREES

Les Anderson, whose photo is on front cover, tells us 30 acres planted to Golden Delicious and other Stark Trees averaged him **$8,000.00 A Year For 6 Years** — MORE CASH MONEY THAN HE RECEIVED FROM ALL CROPS FROM 670 ACRES of good Illinois FARM LAND he owns. In 6 years he sold **$48,000.00** worth of apples from STARK RECORD-BEARING STRAIN TREES! **Stark Trees Multiply Profits from Farm Land.**

STARK BRO'S NURSERIES—119 Years Old—At LOUISIANA, MO.
